NORTHVIEW HIGH SCHOOL Course Description Booklet 2024 – 2025

Mr. Chris Mauk NHS Principal

Dear Student:

This course description booklet has been developed by the school corporation with the help of the Northview High School faculty, staff, and administration to ensure that all graduation requirements are fulfilled and that all students' courses coincide with their career choices. Decisions concerning the academic program you pursue are among the most important choices you will make in the near future. This booklet will provide you information to plan your course schedule, study graduation requirements, view descriptions of courses, and comprehend the academic honors diploma and many more topics.

It is important that you and your parents plan your high school course of study so that you will receive the maximum benefits from the curriculum. It will be desirable for you, along with your parents' assistance, to develop both short and long-range goals that will assist you in your future endeavors. One should decide what career will be sought after graduation and how he/she can contribute to society.

Please use this guide wisely and seek additional information that will supplement this material. I extend our best wishes for an exciting voyage through Northview High School.

Sincerely,

Chris Mauk Principal

PLAN OF INSTRUCTION

Clay Community Schools offers a comprehensive high school program with a curriculum designed to allow students to complete requirements for graduation as prescribed by the State Department of Education as well as prepare for entry to post-secondary institutions, vocational education, and entry-level employment skills. Students should give serious consideration to the planning of a full four-year program prior to entering grade nine. This program plan may need modification as the student progresses in his or her high school career. Specific class choices within a field of study may not be certain, but plans to take course work in that field may be determined. For example, a student may plan for enrollment in Chemistry II, but decide later that Physics is more appropriate. Students should carefully review their four-year plans each year during pre-enrollment.

The handbook is designed to aid incoming freshmen as well as upperclassmen in careful program planning. Statements of policies and procedures as well as the information about curricula should be studied and referred to during the pre-enrollment process. Students should preview course offerings available and those required for all four years of their high school career. All courses in this booklet are offered; however, only those courses having sufficient enrollment will be taught.

Students will participate in a seven-period day. When planning courses for any particular year, carefully note whether they are full year courses or only a semester in length. Students may not begin the second semester of a full year course unless they have completed the first semester.

It is in the best interest of students to make conscious, responsible decisions. Do not rely on luck.

TERM DEFINITION

Audit: A course that is taken for no grade or credit. Textbook rental and fees are charged as with other classes. The course will appear on the transcript as an audit.

Career Academic Sequence: Selection of electives in a deliberate manner that allows students to take full advantage of career exploration and preparation opportunities.

Career & Course Plan (Curricular Program): Systematic arrangement of all courses over the four years of high school to meet a definite objective or goal.

Credit: A term indicating that a pupil has successfully completed a class which meets one period per day, five days per week, for one semester.

Elective: A class, not required, that a student may choose to study.

Pre-enrollment: The indication by each pupil of the classes one proposes to attend for the upcoming year. Pre-enrollment occurs during the spring semester and allows the school to plan the school program for the following year.

Prerequisite: A course that must be completed with credit prior to enrollment in another course.

Required course: A class, required by the State of Indiana or the local school corporation, to be successfully completed by all students.

HIGH SCHOOL DIPLOMA - GRADUATION PATHWAY OPTIONS

With the passage of <u>Graduation Pathways</u>, students are now able to individualize their graduation requirements to align to their postsecondary goal. No longer must all students fit into the same academic mold, but rather, they can choose the options that best meet their postsecondary needs and aspirations. Students can create pathways that serve their educational interests and prepares them for postsecondary educational and career opportunities. Overall, this policy ensures that students are truly prepared to be successful in whatever they want to pursue after high school.

Graduat	tion Requirements	Graduation Pathway Options	
1)	High School Diploma	• Core 40 designation;	
	Students must complete	Academic Honors designation;	
	the course requirements	Technical Honors designation;	
	of one of the following.)	General designation	
2)	Learn and Demonstrate	Learn employability skills standards through locally developed programs.	
	Employability Skills	Employability skills are demonstrated by one of the following:	
	(Students must complete	Project-Based Learning Experience; OR	
	<u>at least one</u> of the	Service-Based Learning Experience; OR	
	following.)	Work-Based Learning Experience.	
3)	Postsecondary-Ready	• Honors Designation: Fulfill all requirements of either the Academic or	
	Competencies	Technical Honors designation; OR	
	(Students must complete	• ACT: College-ready benchmarks; OR	
	at least one of the	• SAT: College-ready benchmarks; OR	
	following.)	• ASVAB: Earn at least a minimum AFQT score to qualify for placement into	
		one of the branches of the US military; OR	
		• State-and Industry-recognized Credential or Certification; OR	
		Federally-recognized Apprenticeship; OR	
		• Career-Technical Education Concentrator: Under the previous definition of	
		a CTE Concentrator, a student must earn a C average or higher in at least 6	
		high school credits in a career sequence. The updated definition is a student	
		must earn a C average in at least two non-duplicative advanced courses	
		(courses beyond an introductory course) within a particular program or	
		program of study. AP/IB/Dual Credit/Cambridge International courses or	
		CLEP Exams : Must earn a C <u>average</u> or higher in at least three courses; OR	
		• Locally Created Pathway that meets the framework from and earns the	
		approval of the State Board of Education	

GENERAL DIPLOMA

The completion of Core 40 is an Indiana graduation requirement. Indiana's Core 40 curriculum provides the academic foundation all students need to succeed in college and the workforce.

To graduate with less than Core 40, the following formal opt-out process must be completed:

- The student, the student's parent/guardian, and the student's counselor (or other staff member who assists students in course selection) must meet to discuss the student's progress.
- The student's Graduation Plan (including four year course plan) is reviewed.
- The student's parent/guardian determines whether the student will achieve greater educational benefits by completing the general curriculum or the Core 40 curriculum.
- If the decision is made to opt-out of Core 40, the student is required to complete the course and credit requirements for a general diploma and the career/academic sequence the student will pursue is determined.

Course and Credit Requirements

English/Language Arts	8 credits in English, literature, composition and speech
Mathematics	4 credits (2 credits Algebra I and 2 credits any math course) General diploma students are required to earn 2 credits in a Math or a Quantitative Reasoning (QR) course during their junior or senior year. QR courses do not count as math credits.
Science	4 credits (2 credits Biology I, 2 credits any science course) At least one credit must be from a Physical Science or Earth and Space Science course
Social Studies	4 credits (2 credits US History, 1 credit US Govt., 1 credit Economics)
Physical Education Health and Wellness	2 credits 1 credit (<i>There is a Family Consumer Science alternative for the health requirement. Please refer to</i> page 36)
Career and Technical Education Required Courses	1 credit Digital Applications and Responsibility (Grade 12) 1 credit Preparing for College and Careers 1 credit Personal Financial Responsibility
Career Academic Sequence	6 credits (Selecting electives in a deliberate manner to take full advantage of career exploration and preparation opportunities)
Flex Credit	 5 credits To earn the 5 Flex Credits a student must complete one of the following: Additional courses to extend the career-academic sequence. Courses involving workplace learning, which may include the following courses: Career exploration internship, career planning and success skills (internship), business cooperative experiences, cooperative family and consumer sciences, industrial cooperative education, interdisciplinary cooperative education, marketing field experience. Advanced career-technical education, college credit Additional courses in: language arts, social studies, mathematics, science, world languages, fine arts
Electives	11 credits
Total: 47 Credits

Additional Requirements		 C or above in courses that will count toward the diploma: GPA of 3.0 or above; complete <u>one</u> of the following: A) Earn 4 credits in 2 or more AP courses and take corresponding AP exams B) Earn 6 verifiable transcripted college credits in dual credit courses from priority course list C) Earn <u>two</u> of the following: Minimum of 3 verifiable transcripted college credits in AP courses and corresponding AP exams. D) Earn a combined score of 1250 or higher on SAT and minimum 560 on Math and 590 on evidence based reading/writing. Earn an ACT composite of 26 or higher and complete written section 	C or above in courses that will count toward the diploma: GPA of 3.0 or above; complete <u>one</u> of the following, A) Any one option (A-E) of Core 40 w/Academic Honors

VALEDICTORIAN AND SALUTATORIAN

The valedictorian and the salutatorian shall be determined based on seven semesters of work and upon meeting the requirements to earn an Academic Honors diploma. Only students earning a Core 40 with Academic Honors will meet the requirement to be recognized as valedictorian and salutatorian.

ADVANCED PLACEMENT PROGRAM

The Advanced Placement (AP) Program is a cooperative educational endeavor between secondary schools and colleges and universities. It allows high school students to undertake college-level academic learning in AP courses, and gives them the opportunity to show that they have mastered the advanced material by taking AP exams. Students can receive credit, advanced placement, or both from thousands of colleges and universities that participate in the Advanced Placement Program.

AP courses make substantial academic demands on students. Students are required to do outside reading and other assignments and to demonstrate the analytical skills and writing abilities expected of first-year students in a strong college program. This experience helps students develop the intellectual skills and self-discipline they will need in college. For these motivated students, AP can also reduce college costs and time to obtain a degree.

Northview High School currently offers Pre-AP courses in English, mathematics, science and social studies to help students acquire the academic skills necessary for success in AP courses. Additionally, we offer Advanced Placement courses in Literature and Composition, European History, US History, Psychology, Calculus, Statistics, Biology, Chemistry, and Physics. Please see your guidance courselor if you are interested in any of these opportunities.

COURSES WITH POTENTIAL DUAL CREDIT AVAILABILITY

A variety of courses are available for college credit through post-secondary institutions such as Ball State, ISU, Ivy Tech, Vincennes University, and IU. Please see your guidance counselor if you are interested in any of these opportunities.

GENERAL INFORMATION

Parents and students in Clay Community Schools should note the following recommendations of school administrators, staff and counselors:

Vocational programs are usually two-year and possibly three-year programs. A student enrolling in these programs is expected to complete the entire program. Students will be dropped from the program only at the request of the instructor and/or counselor after a careful evaluation of the student's academic needs.

Career and Technology Education (CTE) is a course of study designed to meet the need for high school graduates to have more career and technically oriented educational backgrounds. This coursework is application-based, or hands-on, and challenging.

Students attaining less than a C- average in a course should carefully consider proceeding to the next level in that course work. For example, a student attaining less than a C- average in Algebra II should probably not enroll in pre-calculus. Exceptions to this statement do occur, and require thorough counseling and serious thought. Students may successfully combine academic and technological classes if there is careful planning for this option. One would expect capable students to enter challenging courses, which require academic or applied background in English, mathematics and science.

Students with a "late" start in accomplishing skills necessary for entrance into more demanding courses may make the decision to attain those skills and enroll at a later date. The prerequisite skill considerations should not be abandoned. Students with limited knowledge may obtain an education suitable for entry-level employment opportunities. Curriculum requirements may be modified to meet individual needs. All students will be placed in the most appropriate class section possible. Students and parents will be given recommendations by the teaching staff and counselor of the best possible course selections. However, the uniqueness of each student prevents certainty such a program will exactly match the student's needs. Likewise, many dedicated students can make any program a success.

Students will be best prepared if they always strive to achieve their maximum level after enrolling in a course. Even a student with an "A" average in math, and the ability to score in the 90th percentile should study for each math class in order to be prepared to continue to the next level of difficulty.

While many students may not be certain of what they want to do in the future, they may have one or several areas of interest. The wise student plans a program carefully, but at the same time, "keeps their options open."

Students participating in athletics or other time-consuming activities are reminded of the demands such opportunities place on their time and are advised that consideration of a study hall may help in class selection and scheduling.

Student athletes who may have questions regarding NCAA eligibility and appropriate course selection should consult the athletic liaison counselor.

Students who do not wish to earn credit for a course may choose to audit a course if space is available. Audited courses must have Guidance Directors approval. Audit students become a part of the regular class roster for a course, and all course requirements must be completed. The student's transcript will reflect the course taken, but no grade will be given nor will the student receive credit toward graduation.

EARLY GRADUATION

The School Board acknowledges that some students are pursuing educational goals which include graduation from high school at an earlier date than their designated class.

Application for early graduation shall be in accordance with State regulations. The principal may honor this request if all conditions for graduation are met and the student fulfills the graduation requirements.

The student may participate in the graduation ceremonies with his/her designated class.

A student qualifying for early graduation by the end of grade eleven (11) is eligible for a state early graduation scholarship subject to the provisions of Indiana statutes. Any student requesting an early graduation may obtain information regarding the scholarship from **the building principal**.

Legal I.C. 21-12-10

CHANGES IN PRE-ENROLLED CLASS SELECTIONS

The course offerings are based upon student requests during pre-enrollment. Therefore, it is necessary for students to determine their class choices with commitment to completion of those classes. THERE WILL BE NO SCHEDULE CHANGES TO ACCOMMODATE A STUDENT'S CHOICE OF INSTRUCTOR. Arrangement of a student's classes within the school day may be changed by the guidance department to obtain balanced class sizes. When analyzing pre-enrollment forms, alternate classes will be used if: (1) an original class choice is not available due to insufficient enrollment; (2) the student has selected two classes which are offered only once in the school day and both are offered in the same time period; or (3) no seats are available due to the number of requests.

ADDING AND DROPPING COURSES

Any changes in class schedules will be strongly discouraged. Students will NOT be permitted to switch credit generating classes after the last day of the school year in which they registered for next year's courses. Students who have a pre-enrolled study hall or who want to enroll in a more academically challenging course may make a request to add a class within the first ten school days of a semester if there is seat availability in the requested class. Students may not drop a class unless he/she is failing or has the teacher's recommendation. Students who request to drop a course must do so within the first ten school days of a semester and maintain the proper number of credit generating classes in their program of study. Any class dropped after ten days into a semester will result in a W/F (withdrawal/failure) recorded on the permanent record. The W/F is counted as an "F" in computing grade-point average and in determining extra-curricular eligibility.

CORRESPONDENCE CREDIT

A student desiring to complete coursework by correspondence should give this choice careful thought and discuss this option with a counselor. The high school guidance director must give prior written approval for the acceptance of correspondence credit toward graduation requirements. A maximum of twelve credits from a state accredited school taken through correspondence/evening school may be applied toward graduation.

A student may be enrolled in a maximum of 8 credit generating classes at any given time unless approval is received from the Guidance Director. Application for a waiver of this rule will only be considered after completion of the seventh semester. It is recommended that students enroll in no more than two correspondence classes at a given time. Likewise, it is recommended that a correspondence credit be completed during one high school semester. Therefore, if a student enrolls in a correspondence class in October, every attempt should be made to complete that course by the end of the first semester.

Students will not be permitted to take a required course by correspondence unless prior approval is granted by the courselor. They must have previously failed the course or it was unavailable.

APEX

APEX is a high school on-line courseware system that is used by students for remediation, test preparation, or to gain high school credit prior to graduation. Students work individually on the computers but can be assisted as needed by certified teachers, instructional assistants, and student tutors. A course fee will be charged for enrollment in each APEX course.

Students interested in taking APEX courses should contact their guidance counselor for more information.

PREREQUISITES

As you plan and review courses for scheduling, please note any required prerequisites identified above the explanation of the course in the course description. For example, requirements include successful completion of at least one semester of English 9 for English 10 and at least three semesters of English for English 11. Successful completion of at least 5 semesters of English for English 12 classes is recommended.

RETAKING COURSES

If seating in the classroom is available, a student may petition through his/her counselor for the opportunity to repeat any coursework in which the student has earned a semester grade of "C-" or less and have placed on the permanent transcript the higher grade earned. In addition, for classes taken in Middle School for High School credit, if seating in the classroom is available, a parent/legal guardian may petition through the student's counselor for the opportunity to repeat any coursework in which the student has earned a semester grade of "C-"or higher and have placed on the permanent transcript the higher grade earned, so long as the class in taken in consecutive years (i.e. 8th grade year and 9th grade year). The lower grade will be expunged from the record. Additional credit will not be accumulated through this process. A student who has received a grade of "F" in a required course must repeat that course and the "F" grade will be expunged when a higher grade is earned.

TRANSFER STUDENTS - ENROLLMENT

Students transferring to Clay Community Schools are to obtain permission for admission from the principal. Class selection, health forms, and other tasks are to be completed by the guidance department. Students removed for disciplinary reasons from another high school will be denied admission to Clay Community Schools during the semester in which the disciplinary action occurred.

TRANSFER STUDENTS - CREDITS

Clay Community Schools will evaluate and accept credits of students transferring based on the following policy:

- 1. If the transferring student attended a school approved/accredited by that particular state's department of public instruction, coursework will be accepted at face value if those courses are approved curriculum offerings.
- 2. If the transferring student attended a school not approved/accredited by that particular state's department of public instruction, coursework will not be accepted at face value. Clay Community Schools will evaluate such classwork and determine placement of the student.

PERMANENT RECORD MAINTENANCE

Each student shall have a copy of his coursework permanent record maintained by the guidance department. That record shall indicate all courses in which the student was enrolled as of five days following the beginning of each semester. All withdrawals will be recorded on the record.

Students expelled during a semester will have the notation "withdrawn" placed in the area for grades during the semester in which the expulsion occurs. The guidance secretary will maintain permanent records as directed by the Director of Guidance. Copies of records will be released accordingly through the Family Rights and Privacy Acts.

Principles of Agriculture

Grade Level: 9-11 Course #: 7117 Length: 2 Semesters Credits: Two Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Principles of Agriculture</i> is a two-semester course that will cover the diversity of the agricultural industry and agribusiness concepts. Students will develop an understanding of the role of agriculture in the United States and globally. Students will explore Agriculture, Food, and Natural Resource (AFNR) systems related to the production of food, fiber and fuel and the associated health, safety and environmental management systems. Topics covered in the course range from animals, plants, food, natural resources, ag power, structures and technology, and agribusiness. Participation in FFA and Supervised Agricultural Experiences (SAE) will be an integral part of this course in order to develop leadership and career ready skills.

Grade Level: 9-12	Advanced Two-Dimensional Art is a course based on the Indiana Academic Standards
Course #: 4004A	for Visual Art. Students in this course build on the sequential learning experiences of
Length: 1 Semester	Introduction to Two-Dimensional Art that encompass art history, art criticism, aesthetics,
Credit(s): One	and production and lead to the creation of portfolio quality works. Students explore
Diploma: Counts as a Directed	historical and cultural background and connections; analyze, interpret, theorize, and
Elective or Elective for all	make informed judgments about artwork and the nature of art; create two-dimensional
diplomas	works of art, reflect upon the outcomes, and revise their work; relate art to other
	disciplines and discover opportunities for integration; and incorporate literacy and
Prerequisite: Introduction to	presentational skills. They identify ways to utilize and support art museums, galleries,
Two-Dimensional Art	studios, and community resources.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Advanced Two-Dimensional Art II

Grade Level: 10-12	Advanced Two-Dimensional Art II is a course based on the Indiana Academic Standards
Course #: 4004B	for Visual Art. Students in this course build on the sequential learning experiences of
Length: 1 Semester	Introduction to Two-Dimensional Art that encompass art history, art criticism, aesthetics,
Credit(s): One	and production and lead to the creation of portfolio quality works. Students explore
Diploma: Counts as a Directed	historical and cultural background and connections; analyze, interpret, theorize, and
Elective or Elective for all	make informed judgments about artwork and the nature of art; create two-dimensional
diplomas	works of art, reflect upon the outcomes, and revise their work; relate art to other
	disciplines and discover opportunities for integration; and incorporate literacy and
Prerequisite: Advanced Two-	presentational skills. They identify ways to utilize and support art museums, galleries,
Dimensional Art I	studios, and community resources.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Advanced Two-Dimensional Art III

Grade Level: 11-12	Advanced Two-Dimensional Art III is a course based on the Indiana Academic Standards
Course #: 4004C	for Visual Art. Students in this course build on the sequential learning experiences of
Length: 1 Semester	Introduction to Two-Dimensional Art that encompass art history, art criticism, aesthetics,
Credit(s): One	and production and lead to the creation of portfolio quality works. Students explore
Diploma: Counts as a Directed	historical and cultural background and connections; analyze, interpret, theorize, and
Elective or Elective for all	make informed judgments about artwork and the nature of art; create two-dimensional
diplomas	works of art, reflect upon the outcomes, and revise their work; relate art to other
	disciplines and discover opportunities for integration; and incorporate literacy and
Prerequisite: Advanced Two-	presentational skills. They identify ways to utilize and support art museums, galleries,
Dimensional Art II	studios, and community resources.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Advanced Two-Dimensional Art IV

Grade Level: 11-12	Advanced Two-Dimensional Art IV is a course based on the Indiana Academic Standards
Course #: 4004D	for Visual Art. Students in this course build on the sequential learning experiences of
Length: 1 Semester	Introduction to Two-Dimensional Art that encompass art history, art criticism, aesthetics,
Credit(s): One	and production and lead to the creation of portfolio quality works. Students explore
Diploma: Counts as a Directed	historical and cultural background and connections; analyze, interpret, theorize, and
Elective or Elective for all	make informed judgments about artwork and the nature of art; create two-dimensional
diplomas	works of art, reflect upon the outcomes, and revise their work; relate art to other
	disciplines and discover opportunities for integration; and incorporate literacy and
Prerequisite: Advanced Two-	presentational skills. They identify ways to utilize and support art museums, galleries,
Dimensional Art III	studios, and community resources.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Introduction to Three-Dimensional Art

Grade Level: 9-12	Introduction to Three-Dimensional Art is a course based on the Indiana Academic
Course #: 4002	Standards for Visual Art. Students taking this course engage in sequential learning
Length: 1 Semester	experiences that encompass art history, art criticism, aesthetics, production, and
Credit(s): One	integrated studies and lead to the creation of portfolio quality works. Students explore
Diploma: Counts as a Directed	historical and cultural background and connections; analyze, interpret, theorize, and
Elective or Elective for all	make informed judgments about artwork and the nature of art; create three-dimensional
diplomas	works of art, reflect upon the outcomes, and revise their work; relate art to other
	disciplines and discover opportunities for integration; and incorporate literacy and
	presentational skills. They identify ways to utilize and support art museums, galleries,
Prerequisite: None	studios, and community resources.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Ceramics I

Grade Level: 9-12	Ceramics is a course based on the Indiana Academic Standards for Visual Art. Students in
Course #: 4040A	ceramics engage in sequential learning experiences that encompass art history, art
Length: 1 Semester	criticism, aesthetics, and production and lead to the creation of portfolio quality works.
Credit(s): One	Students create works of art in clay utilizing the processes of hand building, molds, slip
Diploma: Counts as a	and glaze techniques, and the firing processes. They reflect upon and refine their work;
Directed Elective or Elective for	explore cultural and historical connections; analyze, interpret, theorize, and make informed

	other disciplines and discover opportunities for integration; and incorporate literacy and
Prerequisite: Ceramics III and	presentational skills. Students utilize the resources of art museums, galleries, and
teacher recommendation	studios, and identify art-related careers.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Visual Communication

Grade Level: 9-12	Visual Communication is a course based on the Indiana Academic Standards for Visual
Course #: 4086	Art. Students in visual communication engage in sequential learning experiences that
Length: 1 Semester	encompass art history, art criticism, aesthetics, and production and lead to the creation of
Credit(s): One	portfolio quality works. They create print media utilizing graphic design, typography,
Diploma: Counts as a Directed	illustration, and image creation with digital tools and computer technology. Students
Elective or Elective for all	reflect upon and refine their work; explore cultural and historical connections; analyze,
diplomas	interpret, theorize, and make informed judgments about artwork and the nature of art;
	relate art to other disciplines and discover opportunities for integration; and incorporate
Dual Credit Availability	literacy and presentational skills. Students utilize the resources of art museums, galleries,
	and studios, and identify art-related careers.
Prerequisite: None	
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Digital Design

Grade Level: 9-12	Digital Design is a course based on the Indiana Academic Standards for Visual Art.
Course #: 4082	Students in digital design engage in sequential learning experiences that encompass art
Length: 1 Semester	history, art criticism, aesthetics, and production and lead to the creation of portfolio quality
Credit(s): One	works. They incorporate desktop publishing, multi-media, digitized imagery, computer
Diploma: Counts as a	animation, and web design. Students reflect upon and refine their work; explore cultural
Directed Elective or Elective for	and historical connections; analyze, interpret, theorize, and make informed judgments
all diplomas	about artwork and the nature of art; relate art to other disciplines and discover
	opportunities for integration; and incorporate literacy and presentational skills. Students
Dual Credit Availability	utilize the resources of art museums, galleries, and studios, and identify art-related
	careers.
Prerequisite: Visual	
Communication	
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Fiber Arts I

Grade Level: 9-12	Fiber Arts I is a course based on the Indiana Academic Standards for Visual Art. Students
Course #: 4046A	in fiber arts engage in sequential learning experiences that encompass art history, art
Length: 1 Semester	criticism, aesthetics, and production and lead to the creation of portfolio quality works.
Credit(s): One	Students create fiber art works utilizing processes such as loom and off-loom construction,
Diploma: Counts as a	dyeing, coiling, and stitchery. They reflect upon and refine their work; explore cultural and
Directed Elective or Elective for	historical connections; analyze, interpret, theorize, and make informed judgments about
all diplomas	artwork and the nature of art; relate art to other disciplines and discover opportunities for
	integration; and incorporate literacy and presentational skills. Students utilize the
Prerequisite: None	resources of art museums, galleries, and studios, and identify art-related careers.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Fiber Arts II

Grade Level: 9-12	Fiber Arts II is a course based on the Indiana Academic Standards for Visual Art. Students
Course #: 4046B	in fiber arts engage in sequential learning experiences that encompass art history, art
Length: 1 Semester	criticism, aesthetics, and production and lead to the creation of portfolio quality works.
Credit(s): One	Students create fiber art works utilizing processes such as loom and off-loom construction,
Diploma: Counts as a	dyeing, coiling, and stitchery. They reflect upon and refine their work; explore cultural and
Directed Elective or Elective for	historical connections; analyze, interpret, theorize, and make informed judgments about
all diplomas	artwork and the nature of art; relate art to other disciplines and discover opportunities for
	integration; and incorporate literacy and presentational skills. Students utilize the
Prerequisite: Fiber Arts I	resources of art museums, galleries, and studios, and identify art-related careers.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Principles of Business Management

Grade Level: 9-12 Course #: 4562 Length: 2 Semesters Credit(s): Two Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability	<i>Principles of Business Management</i> examines business ownership, organization principles and problems, management, control facilities, administration, financial management, and development practices of business enterprises. This course will also emphasize the identification and practice of the appropriate use of technology to communicate and solve business problems and aid in decision making. Attention will be given to developing business communication, problem-solving, and decision-making skills using spreadsheets, word processing, data management, and presentation software.
Prerequisite: None	

Accounting Fundamentals

Grade Level: 10-12 Course #: 4524 Length: Full year Credit(s): Two Diploma: Counts as a Directed Elective or Elective for all	Accounting Fundamentals introduces the language of business using Generally Accepted Accounting Principles (GAAP) and procedures for proprietorships and partnerships using double-entry accounting. Emphasis is placed on accounting principles as they relate to both manual and automated financial systems. This course involves understanding, analyzing, and recording business transactions and preparing, analyzing, and interpreting financial reports as a basis for decision-making.
Required Prerequisite: Principles of Business	
Management, may be taken	
concurrently	
CTE Concentrator A for Finance and Investment Pathway (for NHS only)	
	CTE Concentrator B for Business Administration Pathway

Finance and Investment

(Course will not be offered school year 2024-2025)

CTE Concentrator A – Business Administration Pathway
E

Marketing Fundamentals

Grade Level: 11-12 Course #: 5914 Length: 2 Semesters Credit(s): Two Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability Required Prerequisite: Principles of Business	<i>Principles of Marketing</i> provides a basic introduction to the scope and importance of marketing in the global economy. Emphasis is placed on oral and written communications, mathematical applications, problem solving, and critical thinking skills as they relate to advertising/promotion/selling, distribution, financing, marketing-information management, pricing, and product/service management.
Management, may be taken	
concurrently	
	CTE Concentrator A – Marketing and Sales Pathway

Strategic Marketing

Grade Level: 12 Course #: 5918 Length: 2 Semesters Credit(s): Two Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Strategic Marketing</i> builds upon the foundations of marketing and applies the functions of marketing at an advanced level. Students will study the basic principles of consumer behavior and examine the application of theories from psychology, social psychology and economics. The relationship between consumer behavior and marketing activities are reviewed.
Required Prerequisite: Principles of Business Management and Marketing Fundamentals, may be taken concurrently	
CTE Concentrator B – Marketing and Sales Pathway	

Principles of Computing

Grade Level: 9-11 Course #: 7183 Length: 2 Semesters	Principles of Computing provides students the opportunity to explore how computers can be used in a wide variety of settings. The course will begin by exploring trends of computing and the necessary skills to implement information systems. Topics include
Credit(s): 1 credit per semester; 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all diplomas	operating systems, database technology, cybersecurity, cloud implementations and other concepts associated with applying the principles of good information management to the organization. Students will also have the opportunity to utilize basic programming skills to develop scripts designed to solve problems. Students will learn about algorithms, logic development and flowcharting.
Prerequisite(s): None	
Fulfills a science requirement for all diplomas	
Qualifies as a quantitative reasoning course	

Topics in Computer Science

Grade Level: 10-12 Course #: 7351 Length: 2 Semesters Credit(s): 1 credit per semester; 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all diplomas	Topics in Computer Science is designed for students to investigate emerging disciplines within the field of computer science. Students will use foundational knowledge from 7183 Principles of Computing to study the areas of data science, artificial intelligence, app/game development, and security. Students will utilize knowledge related to these areas and programming skills to develop solutions to authentic problems.
Required Prerequisite: Principles of Computing or this course may be taken concurrently with Principles of Computing.	
Fulfills a science requirement for all diplomas	
Qualifies as a quantitative reasoning course	
	CTE – Concentrator A - Computer Science Pathway

Computer Science

Grade level: 11-12 Course #: 7352 Length: 2 Semesters required Credit(s): 1 credit per semester, 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Required Prerequisite: Principles of Computing, Topics in Computer Science	<i>Computer Science</i> introduces the fundamental concepts of procedural programming. Topics include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging. The course also offers an introduction to the historical and social context and overview of computer science as a discipline.
Fulfills a science requirement for all diplomas	
Qualifies as a quantitative reasoning course	
	CTE Concentrator B-Computer Science Pathway

Principles of Business Operations and Technology

Grade Level: 9-12 Course #: 7153 Length: 2 Semesters Credit(s) 1 credit per sem. 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	The Principles of Business Operations and Technology course will prepare students to plan, organize, direct, and control the functions and processes of a firm or organization and be successful in a work environment. Students are provided opportunities to develop attitudes and apply skills and knowledge in the areas of business, management, Microsoft Office, and finance. Individual experiences will be based upon the student's career and educational goals.
Prerequisite: None	

Business Office Communications

Grade Level: 10-12 Course #: 7144 Length: 2 Semesters Credit(s) 1 credit per sem. 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Required Prerequisite: Principles of Business Operations and Technology, may be taken concurrently	The Business Office Communications course emphasizes the analysis of communication to direct the choice of oral and written methods and techniques. It includes practice in writing a variety of messages used to communicate in business and industry with an emphasis on the potential impact of the message on the receiver as a basis for planning and delivering effective business communications. Through projects and the development of messages students will develop their knowledge and skills for the use of Microsoft Word and Microsoft PowerPoint.
CTI	E Concentrator A – Business Operations and Technology Pathway

Digital Data Applications

Grade Level: 10-12 Course #: 7146 Length: 2 Semesters Credit(s) 1 credit per sem. 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	Students will use Microsoft Excel to sort and search records, combine files, produce reports, and to extract data from a file. This course is designed to include creating and formatting worksheets, using formulas and basic functions, creating charts, and printing professional-looking reports. Additionally, students will use Microsoft Access to create a database and to manage a database through the creation and modification of a query. Students will also be expected to produce reports from the information.
Required Prerequisite: Principles of Business Operations and Technology, and Business Office Communications, may be taken concurrently	
CTE	Concentrator B – Business Operations and Technology Pathway

Business Math

Grade Level: 10-12	Business Math is a business course designed to prepare students for roles as
Course #: 4512	entrepreneurs, producers, and business leaders by developing abilities and skills that are
Length: Full Year	part of any business environment. A solid understanding of math including algebra, basic
Credit(s): Two	geometry, statistics and probability provides the necessary foundation for students
Diploma: Counts as a Directed	interested in careers in business and skilled trade area. The content includes
Elective or Elective for all	mathematical operations related to accounting, banking and finance, marketing, and
diplomas	management. Instructional strategies will include simulations, guest speakers, Internet
	research, and business experiences. *This course may fulfill up to two credits of the
	minimum mathematics requirement for graduation. **This course does not fulfill part of
Prerequisite: None	the mathematics requirement for a Core 40 or Academic Honors Diploma.
Fulfills a Mathematics requirement for the General Diploma only	
Qualifies as a quantitative reasoning course	

Digital Applications and Responsibility (DAR)

Grade Level: 9-12	Digital Applications and Responsibility prepares students to use technology in an
Course #: 4528	effective and appropriate manner in school, in a job, or everyday life. Students develop
Length: 1 Semester	skills related to word processing, spreadsheets, presentations, and communications
Credit(s): One	software. Students will learn what it means to be a good digital citizen and how to use
Diploma: Counts as a Directed	technology, including social media responsibility. Students expand their knowledge of
Elective or Elective for all	how to use digital devices and software to build decision-making and problem-solving
Diplomas	skills. Students should be provided with the opportunity to seek industry-recognized
	digital literacy certifications.
Prerequisite: None	
Grades 12 Required for Graduation	

Personal Financial Responsibility

Grade Level: 9-12	This course addresses the identification and management of personal financial resources
Course #: 4540	to meet the financial needs and wants of individuals and families, considering a broad
Length: 1 Semester	range of economic, social, cultural, technological, environmental, and maintenance factors.
Credit(s): One	This course helps students build skills in financial responsibility and decision making;
Diploma: Counts as a Directed	analyze personal standards, needs, wants, and goals; identify sources of income, saving,
Elective or Elective for all	and investing; understanding banking, budgeting, record-keeping and management risk,
diplomas	insurance and credit card dept. A project based approach and applications through
	authentic settings such as work based observations and service learning experiences are
	appropriate. Direct, concrete applications of mathematics proficiencies in projects are
Prerequisite: None	encouraged.
*Required for graduation	
Qualifies as a quantitative reasoning course	

Cooperative Education

Grade Level: 12 Course #: 6162 Length: 2 Semesters Credit(s): 3 credits per semester maximum of 6 Diploma: Counts as a Directed Elective or Elective for all Diplomas	Cooperative Education is an approach to employment training that spans all career and technical education program areas through school-based instruction and on the job training. Time allocations are a minimum of fifteen hours per week of on-the-job training and approximately five hours per week of school-based instruction, focused on employability skills development. Additionally, all state and federal laws and regulations related to student employment and cooperative education must be followed. NOTE: This course no longer counts toward concentrator status.
Prerequisite: None	

Principles of Advanced Manufacturing

Grade Level: 9-11 Course #: 7108 Length: 2 Semesters Credit(s): 1 credit per sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Principles of Advanced Manufacturing</i> is a course that includes classroom and laboratory experiences in industrial technology and manufacturing trends. Domains include safety and impact, manufacturing essentials, lean manufacturing, design principles, and careers in advanced manufacturing. Hands-on projects and team activities will allow students to apply learning on the latest industry technologies. Work-based learning experiences and industry partnerships are highly encouraged for an authentic industry experience.
Prerequisite: None	

Introduction to Construction

Grade Level: 9-12	Introduction to Construction is a course that will offer hands-on activities and real world
Course #: 4792	experiences related to the skills essential in residential, commercial and civil building
Length: Full Year	construction. During the course students will be introduced to the history and traditions of
Credit(s): Two	construction trades. The students will also learn and apply knowledge of the care and safe
Diploma: Counts as a Directed	use of hand and power tools as related to each trade. In addition, students are introduced
Elective or Elective for all	to blueprint reading, applied math, basic tools and equipment, and safety. Students will
Diplomas	demonstrate building construction techniques, including concrete and masonry, framing,
	electrical, plumbing, dry walling, HVAC, and painting as developed locally in accordance
	with available space and technologies. Students learn how architectural ideas are
	converted into projects and how projects are managed during a construction project in this
	course. Students study construction technology topics such as preparing a site, doing
	earthwork, setting footings and foundations, building the superstructure, enclosing the
	structure, installing systems, finishing the structure, and completing the site. Students also
	investigate topics related to the purchasing and maintenance of structures, special
Prerequisite: None	purpose facilities, green construction and construction careers.

Introduction to Design Processes

Grade Level: 9-10	Introduction to Design Processes is a course that specializes in modern design and
Course #: 4794	engineering processes with a focus on creative problem solving in developing, testing,
Length: Full Year	
5	communicating, and presenting post-evaluation of products. Students use the design
Credit(s): Two	process to analyze research, develop ideas, and produce products solutions. This
Diploma: Counts as a Directed	process gives a framework through which they design, manufacture, test and present their
Elective or Elective for all	ideas. Students will demonstrate and utilize design principles and elements for visual
Diplomas	presentation. Designing aspects will also cover aesthetics, ergonomics, the environment,
	safety, and production. The design process is a core-learning tool for many courses
	enabling the student to solve problems in a systematic, logical and creative manner.
	Students develop a good understanding of the way the process helps them think creatively
	and developing aesthetic ideas. The design process encourages the students to engage
Prerequisite: None	in higher level thinking to create solutions for many problems.

Design Fundamentals (Course will not be offered school year 2024-2025)

Prerequisite: None	
*Course runs concurrently with course #4574- Web Design	
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Introduction to Transportation

Grade Level: 9-10	Introduction to Transportation is an introductory course designed to help students become
Course #: 4798	familiar with fundamental principles in modes of land, sea, air and space transportation,
Length: Full Year	including basic mechanical skills and processes involved in transportation of people, cargo,
Credit(s): Two	and goods. Students will gain and apply knowledge and skills in the safe application,
Diploma: Counts as a Directed	design, production, and assessment of products, services, and systems as it relates to the
Elective or Elective for all	transportation industries. Content of this course includes the study of how transportation
Diplomas	impacts individuals, society, and the environment. This course allows students to reinforce,
	apply, and transfer their academic knowledge and skills to a variety of interesting and
Prerequisite: None	relevant transportation related activities, problems, and settings.

Computers in Design and Production

Grade Level: 9-10	Computers in Design and Production is a course that specializes in using modern
Course #: 4800	technological processes, computers, design, and production systems in the production of
Length: 1 or 2 Semesters	products and structures through the use of automated production systems. Emphasis is
Credit(s): 1 credit per sem., 2	placed on using modern technologies and on developing career related skills for electronics,
credits maximum	manufacturing, precision machining, welding, and architecture career pathways. Students
Diploma: Counts as a Directed	apply ingenuity using tools, materials, processes, and resources to create solutions as it
Elective or Elective for all	applies in the electronics, manufacturing, precision machining, welding, and architecture.
Diplomas	The content and activities will be developed locally in accordance with available advanced
	technologies in the school. Course content will address major technological content related
	to topics such as: Architectural drawing and print design, design documentation using CAD
	systems; assignments involving the interface of CAD, CNC, CAM, and CIM technologies;
	computer simulation of products and systems; publishing of various media; animation and
	related multimedia applications; 3-D modeling of products or structures; digital creation and
	editing of graphics and audio files; control technologies; and automation in the modern
Prerequisite: None	workplace.

Introduction to Engineering Design

Grade Level: 9-12	Introduction to Engineering Design is a fundamental pre-engineering course where students
Course #: 4802	become familiar with the engineering design process. Students work both individually and in
Length: Full Year	teams to design solutions to a variety of problems using industry standard sketches and
Credit(s): Two	current 3D design and modeling software to represent and communicate solutions. Students
Diploma: Counts as a Directed	apply their knowledge through hands-on projects and document their work with the use of
Elective or Elective for all	an engineering notebook. Students begin with completing structured activities and move to
Diplomas	solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills. Ethical issues related to
Dual Credit Availability	professional practice and product development are also presented.
Prerequisite: None	

Principles of Engineering

Grade Level: 10-12	Principles of Engineering (PRNC ENG) is a course that focuses on the process of applying
Course #: 5644	engineering, technological, scientific and mathematical principles in the design, production,
Length: 2 Semesters	and operation of products, structures, and systems. This is a hands-on course designed to
Credit(s): Maximum of Two	provide students interested in engineering careers the opportunity to explore experiences related to specialized fields such as civil, mechanical, and materials engineering. Students
Diploma: Counts as a Directed	will engage in research, development, planning, design, production, and project
Elective or Elective for all	management to simulate a career in engineering. The topics of ethics and the impacts of
Diplomas	engineering decisions are also addressed. Classroom activities are organized to allow
	students to work in teams and use modern technological processes, computers, CAD
Dual Credit Availability	software, and production systems in developing and presenting solutions to engineering problems.
Required Prerequisite:	
Introduction to Engineering	
Design	
	Fulfills a Science course requirement for all diplomas
	Qualifies as a quantitative reasoning course
	CTE Concentrator A – Engineering Pathway

Civil Engineering and Architecture

Grade Level: 11-12 Course #: 5650 Length: 2 Semesters Credit(s): 1 credit per sem., two credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability Required Prerequisite:	<i>Civil Engineering and Architecture</i> (CIVIL ENG) Civil Engineering and Architecture introduces students to the fundamental design and development aspects of civil engineering and architectural planning activities. Application and design principles will be used in conjunction with mathematical and scientific knowledge. Computer software programs should allow students opportunities to design, simulate, and evaluate the construction of buildings and communities. During the planning and design phases, instructional emphasis should be placed on related transportation, water resources, and environmental issues. Activities should include the preparation of cost estimates as well as a review of regulatory procedures that would affect the project design.
Required Prerequisite: Introduction to Engineering Design and Principles of Engineering	
Qualifies as a Quantitative Reasoning course	
CTE Concentrator B – Engineering Pathway	

Computer Integrated Manufacturing

Grade Level: 11-12 Course #: 5534 Length: 2 Semesters Credit(s): 1 credit per sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Required Prerequisite:	<i>Computer Integrated Manufacturing</i> is a course that applies principles of rapid prototyping, robotics, and automation. This course builds upon the computer solid modeling skills developed in Introduction of Engineering Design. Students will use computer controlled rapid prototyping and CNC equipment to solve problems by constructing actual models of their three-dimensional designs. Students will also be introduced to the fundamentals of robotics and how this equipment is used in an automated manufacturing environment. Students will evaluate their design solutions using various techniques of analysis and make appropriate modifications before producing their prototypes.
Introduction to Engineering and Principles of Engineering	
Qualifies as a quantitative reasoning course

Debate

Grade Level: 11-12 Course #: 1070 Length: 1 Semester Credit(s): One Diploma: General, Core 40, Academic Honors, Technical Honors Prerequisite: Speech or teacher recommendation	Debate, a course based on the Indiana Academic Standards for English/Language Arts, is the study and application of the basic principles of debate involving support for the basic types of arguments (induction, deduction, causation) and debate strategies (affirmative or negative argument construction and extension, case development, refutation or rebuttal of argument claims and evidence, and persuasive speaking). Students will experience organizing, preparing, and presenting debates in a format which allows for growth and increasing difficulty, culminating in a project. Debate project : Students will complete a project—such as a mock debate or trial, participation in a forum, presentation of an argument supporting or opposing different sides of a major issue—which demonstrates knowledge, application, and presentation progress in the debate course content.
	ulfills an English/Language Arts requirement for all diplomas

Etymology

Grade Level: 11-12 Course #: 1060 Length: 1 Semester Credit(s): One	This course encourages students to become curious about the English language and should enable students to increase vocabularies preparing them to perform well on the PSAT, and the SAT and other standardized tests. <i>Etymology</i> provides instruction in the derivation of English words and word families from their Latin and Greek origins. Pure root
Diploma: General, Core 40, Academic Honors, Technical Honors	etymology deals with the exact origin of the word. Folk etymology is the study of how words have changed due to connotative and denotative associations, euphemisms, cliché's, idioms, etc. This course will look at other foreign origins as they pertain to loanwords from those countries. Students will study both areas of etymology, including prefixes, roots, suffixes, and reasons for language change. The study of word history and semantics will be incorporated through an analysis of some literary texts.
Recommended Prerequisite:	
Successful completion of previous English classes.	NOTE: It is highly recommended that students combine this course with a literature or composition course that may be taken before, concurrently, or after this course.
F	Fulfills an English/Language Arts requirement for all diplomas

Journalism I-1

Grade Level: 10-12 (Freshman may enroll with instructor approval.) Course #: 1080A Length: 1 Semester Credit(s): One Diploma: Counts as an elective for all diplomas	This course provides the study of practice in gathering and analyzing information, interviewing, and note taking for the purpose of writing, editing, and publishing for print, including student publications. The course will include instruction and practice in effective journalistic writing forms and techniques, as well as layout, design, and typography. Representative examples of amateur and professional journalism may be studied. The concept of responsible journalism will be discussed. Students will develop layouts for the yearbook and newspaper. This is a one semester course that is a prerequisite for newspaper and yearbook.
Prerequisite: None	
F	ulfills an English/Language Arts requirement for all diplomas

Journalism I-2

Grade Level: 10-12 (Freshman may enroll with instructor approval.) Course #: 1080B Length: 1 Semester Credit(s): One Diploma: Counts as an elective for all diplomas Prerequisite: None	This is a continuation of the first year of journalism study. It provides continued practice in interviewing, gathering/analyzing material, note taking, editing, and publishing. It also includes more instruction in journalistic writing as well as layout and design. Examples of professional journalistic pieces will be studied and discussed. This is the second semester of beginning journalism, which serves as a prerequisite for any student publications courses.
Fulfills an English/Language Arts requirement for all diplomas	

Digital Media

Grade Level: 10-12	This is a one semester course which provides a study of television, radio, videotape, and

Prerequisite: None	newspapers.
Fulfills an English/Language Arts requirement for all diplomas	

Speech

Grade Level: 11-12 Course #: 1076 Length: 1 Semester Credit(s): One Diploma: General, Core 40,	<i>Speech</i> , a course based on Indiana's Academic Standards for English/Language Arts and the common Core State Standards for English/Language Arts Standards, is the study and application of the basic principles and techniques of effective oral communication. Students deliver focused and coherent speeches that convey clear messages, using gestures, tone, and vocabulary appropriate to the audience and purpose. Students deliver
Academic Honors, Technical Honors	different types of oral and multi-media presentations, including viewpoint, instructional, demonstration, informative, persuasive, and impromptu. Students use the same Standard English conventions for oral speech that they use in their writing.
Prerequisite: Recommended successful completion of at least 4 semesters of English or with approval of administration.	NOTE: Students are strongly encouraged to combine this course with a literature or composition course.
	Fulfills an English/Language Arts requirement for all diplomas

Advanced Speech and Communication

Advanced Speech and Communication, a course based on Indiana's Academic standards		
for English/language Arts and emphasizing the High School Speech and Communication		
Standards, is the study and application of skills in listening, oral interpretation, media		
communications, research methods, and oral debate. Students deliver different types of		
oral and multi-media presentations, including speeches to inform, to motivate, to entertain,		
and to persuade through the use of impromptu, extemporaneous, memorized, or		
manuscript delivery. Advanced Speech and Communication Project: Students complete a		
project, such as multi-media presentations, that are reflective, reports or historical		
investigations, responses to literature, or persuasive arguments, which demonstrates		
knowledge, application, and speaking progress in the Advanced Speech and		
Communication course content.		
NOTE: Students are strongly encouraged to combine this course with a literature or		
composition course that they take before, concurrently, or after this course.		
Speech I composition course that they take before, concurrently, or after this course. This course fulfills English/Language Arts requirements for the General, Core 40, Academic Honors, and/or Technical Honors		
Diplomas.		

Student Media: Newspaper I

Grade Level: 11-12 Course #: 1086A Length: Full Year Credit(s): Two Diploma: Counts as an elective for all diplomas	Student Media: Newspaper I, a course based on the High School Journalism Standards and the student Media Standards, is the continuation of the study of Journalism. Students demonstrate their ability to do journalistic writing and design for high school media, including school newspapers, yearbooks, and a variety of other media formats. Students follow the ethical principles and legal boundaries that guide scholastic journalism. Students express themselves publicly with meaning and clarity for the purpose of informing, entertaining, or persuading. Students work on high school media staffs so that	
Prerequisite: Journalism 1	they may prepare themselves for career paths in journalism, communications, writing, or related fields.	
This course will not satisfy any of the eight semesters of required English.		
Fulfills the Fine Arts requirement for the Core 40 with Academic Honors		

Student Media: Newspaper II

Grade Level: 12	Student Media: Newspaper II is a continuation of Student Publications: Newspaper I.	
Course #: 1086B	The advanced students in this course will serve as editors of the publication and also help	
Length: Full Year	to train new staff members in the various aspects of the newspaper operation.	
Credit(s): Two

	addressed. Direct, concrete mathematics proficiencies will be applied. Laboratory experiences and service learning are part of the curriculum for this course. This course
Required Prerequisite: Fashion	provides the foundation for continuing and post-secondary education in fashion, textile,
and Textiles 1	and apparel-related careers. Portfolio activities are required.
Fulfills a	Fine Arts Requirement for the Core 40 Academic Honors Diploma

Introduction to Housing and Interior Design

Grade Level: 10-12 Course #: 5350 Length: 1 Semester Credit(s): One Diploma: Counts as a Directed Elective or Elective for all diplomas	Introduction to Housing and Interior Design is an introductory course essential for those students interested in academic enrichment or a career within the housing, interior design, or furnishings industry. This course addresses the selection and planning of designed spaces to meet the needs, wants, values, and lifestyles of individuals, families, clients, and communities. Housing decisions, resources, and options will be explored including factors affecting housing choices and the types of housing available. Developmental influences on housing and interior environments will also be considered. Basic historical architectural styling and basic furniture styles will be explored as well as basic identification of the elements and principles of design. Design and space planning involves evaluating floor plans and reading construction documents while learning to create safe, functional, and aesthetic spaces. Presentation techniques will be addresses. Direct, concrete mathematics proficiencies will be applied. A project based approach will be utilized requiring higher-
	proficiencies will be applied. A project based approach will be utilized requiring higher- order thinking, communication, leadership, and management processes as housing and interior design content is integrated into the design of interior spaces while meeting specific project criteria. This course provides the foundation for further study and careers
Prerequisite: None	in the architecture, construction, housing, interior design, and furnishings industries.
	a Fine Arts requirement for the Core 40 Academic Honors Diploma

Human Development and Wellness

Grade Level: 10-12	Students in this one semester course address development and wellness of individuals
Course #: 5366	and families throughout the life cycle. Emphasis is placed on the significance of serious
Length: 1 Semester	dating patterns, mate selection, and readiness for marriage. Personality traits conducive
Credit(s): One	to functional family living are examined. The engagement period is explored in detail

Nutrition and Wellness

Grade Level: 9-12 Course #: 5342 Length: 1 Semester Credit(s): One Diploma: Counts as a Directed Elective or Elective for all diplomas	In this one semester class nutrition is the foundation for food preparation. Basic principles of food preparation, menu planning, and time management in the kitchen are emphasized. Safety of food is stressed including the use of sanitary procedures in preparation, service, and storage of food. Understanding what is being eaten, developing moderation in eating patterns, and establishing lifelong healthy eating choices are the focus of this class. The impact of daily food choices and the importance of exercise are stressed through the study of USDA Dietary Guidelines and My Plate. Fat and calorie reduction methods are used to improve the nutritional value of some recipes. Dining out choices are evaluated and discussed. Many preparation and tasting opportunities are provided in this course. Food labs may include: healthy snacks and desserts, using vegetables and fruits in recipes, breads, pasta, holiday cooking, Italian and Oriental cooking, and creating new recipes. A wide variety of additional labs are included in <i>Nutrition and Wellness</i> . Careers and career pathways will also be discussed. Students will be expected to participate in kitchen
Prerequisite: None	organization and clean-up as needed.

Advanced Nutrition and Foods

Grade Level: 11-12	Advanced Nutrition and Foods is a course that incorporates more complex concepts in
Course #: 5340	nutrition and foods. Proper food handling, advanced food preparation skills and meal

Wellness	

Principles of Culinary and Hospitality

Grade Level: 9-12 Course #: 7173 Length: 2 Semesters Credit(s): 1 credit per Sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Principles of Culinary and Hospitality</i> is designed to develop an understanding of the hospitality industry and career opportunities, and responsibilities in the food service and lodging industry. Introduces procedures for decision making which affects operation management, products, labor, and revenue. Additionally, students will learn the fundamentals of food preparation, basic principles of sanitation, service procedures, and safety practices in the food service industry including proper operation techniques for equipment.
Prerequisite: None	

Nutrition

Grade Level: 10-12 Course #: 7171 Length: 2 Semesters Credit(s): 1 credit per Sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Nutrition</i> students will learn the characteristics, functions and food sources of the major nutrient groups and how to maximize nutrient retention in food preparation and storage. Students will be made aware of nutrient needs throughout the life cycle and to apply those principles to menu planning and food preparation. This course will engage students in hands-on learning of nutritional concepts such as preparing nutrient dense meals or examining nutritional needs of student athletes.
Required Prerequisite: Principles of Culinary and Hospitality, may be taken concurrently	
CTE Concentrator A - Culinary Arts – Baking and Pastry Pathway	

Culinary Arts

Grade Level: 10-12 Course #: 7169 Length: 2 Semesters Credit(s): 1 credit per Sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	Culinary Arts teaches students how to prepare the four major stocks, the five mother sauces (in addition to smaller sauces) and various soups. Additional emphasis is placed on the further development of the classical cooking methods. This course will also present the fundamentals of baking science including terminology, ingredients, weights and measures, and proper use and care of equipment. Students will produce yeast goods, pies, cakes, cookies, and quick breads.
Required Prerequisite: Principles of Culinary and Hospitality and Nutrition, may be	
taken concurrently CTE Concentrator B - Culinary Arts – Baking and Pastry Pathway	

EDUCATION PROFESSIONS PATHWAY

A student application and signed Code of Conduct are required for this pathway. The application and Code of Conduct will be good for both your Junior and Senior years unless there is a problem during the first year. Students must be able to drive to and from sites during the school day. An application for this pathway must be completed and a Code of Conduct must be signed by both the student and parent or guardian. Students are required to have a minimum GPA of 2.5 and no major discipline infractions or the student can file an appeal with the instructor of the class. The instructor and the principal will review the application and then have a meeting with the student in question. Excellent attendance is imperative for this class and the first unexcused absence will result in meeting with the instructor. The second unexcused absence will be grounds for potentially being removed from the program. Excused absences are defined on the school's webpage under the Parents and Community tab then go to the Secondary Handbook. All students who are absent on site days must contact their mentor teacher at their placement site, the course instructor, and Northview High School attendance office.

STUDENTS WILL TAKE PRINCIPLES OF TEACHING CONCURRENTLY WITH CHILD AND ADOLESCENT DEVELOPMENT AND TEACHING AND LEARNING COURSES.

Principles of Teaching

Grade Level: 11 Course #: 7161 Length: 2 Semesters Credit(s): 1 credit per Sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	This course provides a general introduction to the field of teaching. Students will explore educational careers, teaching preparation, and professional expectations as well as requirements for teacher certification. Current trends and issues in education will be examined. A volunteer experience of a minimum of 20 hours is required for successful completion of this course. This course has been approved to be offered for dual credit. Students pursuing this course for dual credit are still required to meet the minimum prerequisites for the course and pass the course with a C or better in order for dual credit to be awarded.
Dual Credit Availability	
Co-requisite: Child & Adolescent Development, will be taken concurrently	

Child and Adolescent Development

Grade Level: 11 Course #: 7157 Length: 2 Semesters Credit(s): 1 credit per Sem., 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all DiplomasChild and Adolescent Development examines the physical, social, emotional, cognitive, and moral development of the child from birth through adolescence with a focus on the middle years through adolescence. Basic theories of child development, biological and environmental foundations of development, and the study of children through observation and interviewing techniques are explored. The influence of parents, peers, the school environment, culture and the media are discussed. An observation experience of up to 20 hours may be required for completion of this course. This course has been approved to be offered for dual credit. Students pursuing this course for dual credit are still required to meet the minimum prerequisites for the course and pass the course with a C or better in order for dual credit to be awarded.Co-requisite: Principles of Teaching, will be taken concurrentlyCTE Concentrator A - Education Professions Pathway

Education I and II	develop skills and attitudes that promote a healthy lifestyle.

Health and Wellness Education

Health and Wellness provides the basis to help students adopt and maintain healthy
behaviors. Health education should contribute directly to a student's ability to successfully
practice behaviors that protect and promote health and avoid or reduce health risks.
Through a variety of instructional strategies, students practice the development of
unctional health information (essential concepts); determine personal values that support
nealth behaviors; develop group norms that value a healthy lifestyle; develop the essential
skills necessary to adopt, practice, and maintain health-enhancing behaviors. This course
ncludes the application of priority areas in a planned, sequential, comprehensive health
education curriculum. Priority area include: promoting personal health and wellness,
physical activity, healthy eating, promoting safety and preventing unintentional injury and
violence, promoting mental and emotional health, a tobacco-free lifestyle and an alcohol
and other drug free lifestyle, and promoting human development and family health. This
course provides students with the knowledge and skills to health and wellness core
concepts, analyzing influences, accessing information, interpersonal communication,
decision-making and goal-setting skills, health-enhancing behaviors, and health and
vellness advocacy skills.
s the Health and Wellness requirement for all diploma types

Advanced Health Education

Grade Level: 10-12 Course #: 3500 Length: 1 Semester Credit(s): One Diploma: Counts as an elective requirement for all diplomas	Advanced Health and Wellness provides advanced knowledge and skills to help students adopt and maintain healthy behaviors. Through a variety of instructional strategies, students practice the development of functional advanced health information (essential concepts): determine personal values that support health behaviors; develop group norms that value a healthy lifestyle; develop the essential skills necessary to adopt, practice, and maintain health-enhanced behaviors. Advanced Health and Wellness provides students with an in-depth study of unintentional injury and violence, promoting mental and emotional health, a tobacco, alcohol, and other drug-free lifestyle, and promoting human development and family health. The scientific components of health and wellness, health issues and concerns, health risk appraisals, individual wellness plans, health promotion and health careers are expanded and explored within the context of the course. This
Prerequisite: Health & Wellness	and health careers are expanded and explored within the context of the course. This course provides students with the advanced knowledge and skills of health and wellness core concepts, analyzing influences, accessing information, interpersonal communication, decision-making and goal-setting skills, health-enhancing behaviors, and health and wellness advocacy skills.
Freiequisite. Freditti & Weilfress	

Elective Physical Education: Aerobic Walking

Grade Level: 10-12 Course #: 3564 Length: 1 Semester Credit(s): One Diploma: General, Core 40, Academic Honors, Technical Honors	<i>Elective Physical Education: Aerobic Walking</i> is a one semester course designed to help students understand the various walking programs that are available to increase cardiovascular endurance. Learning experiences include the concepts of heart monitoring, blood pressure measurement, and care of physical injuries inherent to over training or accidents while walking.
Prerequisite: Physical Education I & II	

Elective Physical Education: Functional Fitness

Grade Level: 10-12 Course #: 3562 Length: 1 Semester Credit(s): One Diploma: General, Core 40, Academic Honors, Technical Honors	<i>Elective Physical Education: Functional Fitness</i> is a one semester course designed to develop cardiovascular fitness. Activities may include step aerobics, low/high impact aerobics, interval/circuit training, boot camp, and the latest fitness trends (i.e Pulse, Yoga, Pilates, Zumba, etc.) Students will be required to develop an appropriate aerobic exercise routine and then present/teach that routine to the class as the final assessment.
Prerequisite: Physical Education I & II	

Elective Physical Education: Conditioning and Weight Training I

Grade Level: 10-12 Course #: 3563A Length: Full Year Credit(s): Two Diploma: Core 40, Academic Honors, Technical Honors	This course will help prepare students for a better understanding of lifetime physical fitness. During this course, students will be engaged in team sports, dual sports, stretching, and other cardio activities with a concentrated emphasis on weight training. The academic portion of the course will improve the student's knowledge in areas such as biomechanics and fitness terminology. Students will be given fitness and written exams periodically to assess the understanding of level of fitness.
Prerequisite: Successful completion of Physical Education I and II	

Elective Physical Education: Conditioning and Weight Training II

Grade Level: 11-12 Course #: 3563B Length: Full Year Credit(s): Two Diploma: Core 40, Academic Honors, Technical Honors	This course will help to further prepare students for a better understanding of lifetime physical fitness. During this course, students will be engaged in team sports, dual sports, stretching, and other cardio activities with a concentrated emphasis on weight training. The academic portion of the course will improve the student's knowledge in areas such as biomechanics and fitness terminology. Students will be given fitness and written exams periodically to assess the understanding of level of fitness.
Prerequisite: Elective Physical Education: Conditioning and Weight Training I	

Elective Physical Education: Conditioning and Weight Training III

Grade Level: 12 Course #: 3563C Length: Full Year Credit(s): Two Diploma: Core 40, Academic Honors, Technical Honors	This course will help to further prepare students for a better understanding of lifetime physical fitness. During this course, students will be engaged in team sports, dual sports, stretching, and other cardio activities with a concentrated emphasis on weight training. The academic portion of the course will improve the student's knowledge in areas such as biomechanics and fitness terminology. Students will be given fitness and written exams periodically to assess the understanding of level of fitness.
Prerequisite: : Elective Physical Education: Conditioning and Weight Training II	

Elective Physical Education: Movement and Dance Technique I

Grade Level: 10-12 Course #: 3561A (guard +class) 3561W (class only) Length: Full Year Credit(s): Two Diploma: General, Core 40, Academic Honors, Technical Honors	This second level class provides the opportunity for students to experience more advanced degrees of physical prowess, technique, flexibility, and the study of dance performance. Students will examine choreography and stage productions and observe dance performances through live and recorded means. Students will be able to describe, analyze, interpret, and judge dance performances within the genre. Auditions are held in the spring for entrance into the competing section of the (3561A) class only.
Prerequisite: None	

Elective Physical Education: Movement and Dance Technique II

Grade Level: 11-12 Course #: 3561B(guard +class) 3561X (class only) Length: Full Year Credit(s): Two Diploma: General, Core 40, Academic Honors, Technical Honors	This third level class provides the opportunity for students to experience advanced degrees of physical prowess, technique, flexibility, and the study of dance performance. Students will observe dance performances through live and recorded means. Students will be able to describe, analyze, interpret and judge dance performances within the genre, and choreograph stage productions. Auditions are held in the spring for entrance into the competing section of the class, (3561B only).
Prerequisite: Elective Physical Education: Movement and Dance Technique I	

Elective Physical Education: Movement and Dance Technique III

Grade Level: 12 Course #: 3561C (guard +class) 3561Y (class only) Length: Full Year Credit(s): Two Diploma: General, Core 40, Academic Honors, Technical Honors	This fourth level class provides opportunities for students to experience advanced degrees of physical prowess, technique, flexibility, and the study of dance performance. Students will observe dance performances through live and recorded means. Students will be able to describe, analyze, interpret, and judge dance performances within the genre. They will choreograph stage productions and organize business aspects of a dance concert. Auditions are held in the spring for entrance into the competing section of the (3561C) class only.
Prerequisite: Elective Physical Education: Movement and Dance Technique II	

LAW, PUBLIC SAFETY, CORRECTIONS AND SECURITY

Principles of Criminal Justice

Grade: 9-11 Course #: 7193 Length: Full Year Credits: 2 credits Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Principles of Criminal Justice</i> covers the purposes, functions, and history of the three primary parts of the criminal justice system: law enforcement, courts, and corrections. This course further explores the interrelationships and responsibilities of these three primary elements of the criminal justice system.
Dual Credit Availability	
Required Prerequisite: None	

Law Enforcement Fundamentals

Grade: 10-12 Course #: 7191 Length: Full Year Credits: 2 credits Diploma: Counts as a Directed Elective or Elective for all Diplomas	Law Enforcement Fundamentals critically examines the history and nature of the major theoretical perspectives in criminology and the theories found within those perspectives. Students will analyze the research support for such theories and perspectives, and the connection between theory and criminal justice system practice within all the major components of the criminal justice system. Students will apply specific theories to explain violent and non-violent criminal behavior on both the micro and macro levels of analysis. Additionally, this course will introduce fundamental law enforcement operations and
Dual Credit Availability	organizations. This includes the evolution of law enforcement at the federal, state, and local levels.
Recommended Prerequisite: Principles of Criminal Justice	
CTE Concentrator A – Criminal Justice Pathway	

Corrections and Cultural Awareness

Grade: 10-12 Course #: 7188 Length: Full Year Credits: 2 credits Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability Recommended Prerequisite: Principles of Criminal Justice	<i>Corrections and Cultural Awareness</i> emphasizes the study of American justice problems and systems in historical and cultural perspectives, as well as discussing social and public policy factors affecting crime. Multidisciplinary and multicultural perspectives are stressed. Additionally, this course takes a further examination of the American correctional system that includes the study of administration of local, state, and federal correctional agencies. The examination also includes the history and development of correctional policies and practices, criminal sentencing, jails, prisons, alternative sentencing, prisoner rights, rehabilitation, and community correction that includes probation and parole. Current philosophies of corrections and the debates surrounding the roles and effectiveness of criminal sentences, institutional procedures, technological developments, and special populations are also discussed.

Mathematics Lab - Transition

Course #: 2560 // Length: Full Year r	<i>Mathematics Lab -Transition</i> is a course designed to transition students into a regular Algebra I class the following year. Students will focus on the prerequisite math skills needed for Algebra I as well as the study skills that will be required to be successful in an Algebra I course. Students are placed in this class by recommendation only.
--	---

Algebra I Lab

Grade Level: 9 th & 10 th Course #: 2516 Length: 1 or 2 semesters Credit(s): One or Two Math credits for general diploma or One or Two elective credits for other diplomas; Core 40, Academic Honors, Technical Honors	Algebra I Lab is a mathematics support course for Algebra I. The course provides students with additional time to build the foundations necessary for high school math courses, while concurrently having access to rigorous, grade-level appropriate courses. The five critical areas of Algebra I Lab align with the critical areas of Algebra I. Relationships between Quantities and Reasoning with Equations; Linear and Exponential Relationships; Descriptive Statistics; Expressions and Equations; and Quadratic Functions and Modeling. However, whereas Algebra I contains exclusively grade-level content, Algebra I Lab combines standards from high school courses with foundational standards from the middle grades.
Prerequisite: Must be enrolled in Algebra I	

Algebra I

Grade Level: 9-10 Course #: 2520 Length: Full year Credit(s): Two Diploma: Counts as a Mathematics course for all diplomas	Algebra I formalizes and extends the mathematics students learned in the middle grades. Algebra I is made up of 5 strands: Real Numbers and Expressions; Functions; Linear Equations, Inequalities, and Functions; Systems of Equations and Inequalities; Quadratic and Exponential Equations and Functions; and Data Analysis and Statistics. The critical areas deepen and extend understanding of linear and exponential relationships by contrasting them with each other and by applying linear models to data that exhibit a linear trend, and students engage in methods for analyzing, solving, and using quadratic functions. The Process Standards for Mathematics apply throughout each course and,
Prerequisite: None	together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.
Fulfills the Algebra I / Integrated Mathematics I requirements for all diplomas.	
Students pursuing Core 40, Academic Honors, or Technical Honors Diploma should receive credit for Algebra I by the end of Grade 9	
	Grade 9

Mathematics Lab Algebra II

Grade Level: 9-12 Course #: 2560B Length: 1 or 2 Semesters Credit(s): One or Two Diploma: Counts as an Elective for all diplomas	Mathematics Lab Algebra II provides an opportunity for individualized instruction designed to help students successfully complete high-level work in Algebra II. Although a student may take mathematics labs more than two semesters, only two elective credits may be earned for Mathematics Lab Algebra II. *This course does not meet mathematics credit requirements for graduation.
Prerequisite: Algebra I	

Algebra II

Grade Level: 10-12 Course #: 2522 Length: Full Year Credit(s): Two Diploma: Counts as a Mathematics Course for all diplomas	<i>Algebra II</i> builds on work with linear, quadratic, and exponential functions and allows for students to extend their repertoire of functions to include polynomial, rational, and radical functions. Students work closely with the expressions that define the functions, and continue to expand and hone their abilities to model situations and to solve equations, including solving quadratic equations over the set of complex numbers and solving exponential equations using the properties of logarithms. <i>Algebra II</i> is made up of 5 strands: Complex Numbers and Expressions; Functions; Systems of Equations; Quadratic Equations and Functions; Exponential & Logarithmic Equations and Functions; Polynomial, Rational, and Other Equations and Functions; and Data Analysis, Statistics, and Probability. The Process Standards for Mathematics apply throughout each course and together with the content standards, prescribe that students experience mathematics as a coherent.
	the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem
Prerequisite: Algebra I	situations.
Fulfills th	e Algebra II / Integrated Mathematics III requirements for all diplomas

Algebra II, Pre-AP

Grade Level: 10-12	Algebra II, Pre-AP builds on work with linear, quadratic, and exponential functions and
Course #: 2522T	allows for students to extend their repertoire of functions to include polynomial, rational, and
Length: Full Year	radical functions. Students work closely with the expressions that define the functions, and
Credit(s): Two	continue to expand and hone their abilities to model situations and to solve equations,
Diploma: Counts as a	including solving quadratic equations over the set of complex numbers and solving
Mathematics Course for all	exponential equations using the properties of logarithms. Algebra II, Pre-AP is made up of
diplomas	5 strands: Complex Numbers and Expressions; Functions; Systems of Equations;
	Quadratic Equations and Functions; Exponential & Logarithmic Equations and Functions;
	Polynomial, Rational, and Other Equations and Functions; and Data Analysis, Statistics,
	and Probability. The Process Standards for Mathematics apply throughout each course
	and, together with the content standards, prescribed that students experience mathematics
	as a coherent, useful, and logical subject that makes use of their ability to make sense of
Prerequisite: Successful	problem situations. ANY student who plans to take Advanced Placement Calculus should
completion of Algebra I	take this course as part of their preparations.
Fulfills th	e Algebra II / Integrated Mathematics III requirements for all diplomas

Quantitative Reasoning

Grade: 11-12	Quantitative Reasoning is a mathematics course focused on the study of numeracy, ratio
Course #: 2550	and proportional reasoning, modeling, probabilistic reasoning to assess risk, and
Length: Full Year	statistics. Students build knowledge of and confidence with basic
Credits: 2 credits	mathematical;/analytical concepts and operations required for problem solving decision
Diploma: General, Core 40,	making, and economic productivity in real-world applications and prepare for an
Academic Honors, Technical	increasingly information-based society in which the ability to use and critically evaluate
Honors	information, especially numerical information, is essential. Technology, such as
	computers and graphing calculators should be used frequently. This higher-level
Dual Credit available for Ivy	mathematics course is designed to align with college-level quantitative reasoning courses
Tech Math 123	for dual secondary/college credit. The eight Process Standards for Mathematics apply
	throughout the course. Together with the content standards, the Process Standards
Recommended Prerequisite:	prescribe that students experience mathematics as a coherent, useful, and logical subject
Successful Completion of	that makes use of their ability to make sense of problem situations.
Algebra II	

Mathematics Lab Geometry

Grade Level: 9-12 Course #: 2560C Length: 1 or 2 Semesters Credit(s): One or Two Diploma: Counts as an Elective for all diplomas	<i>Mathematics Lab Geometry</i> provides an opportunity for individualized instruction designed to help students successfully complete high-level work in Geometry. Although a student may take mathematics labs more than two semesters, only two elective credits may be earned for Mathematics Lab Geometry. *This course does not meet mathematics credit requirements for graduation.
Prerequisite: Algebra	

Geometry

Grade Level: 9-12	Geometry formalizes and extends students' geometric experiences from the middle grades.
Course #: 2532	Students explore more complex geometric situations and deepen their explanations of
Length: Full year	geometric relationships, moving towards formal mathematical arguments. Five critical
Credit(s): Two	areas comprise the Geometry course: Logic and Proofs; Points, Lines, Angles, and Planes;
Diploma: Counts as a	Triangles; Quadrilaterals and Other Polygons; Circles; Transformations; and Three-
Mathematics Course for all	dimensional Solids. The Process Standards for Mathematics apply throughout each course
diplomas	and, together with the content standards, prescribe that students experience mathematics
	as a coherent, useful, and logical subject that makes use of their ability to make sense of

Statistics, Advanced Placement

Grade Level: 11-12	Advanced Placement Statistics is a course based on content established by the College
Course #: 2570	Board. The purpose of this course is to introduce students to the major concepts and tools
Length: Full Year	for collecting, analyzing, and drawing conclusions from data. Students are exposed to four
Credit(s): Two	broad conceptual themes. The themes include (1) Exploring Data: Describing patterns and
Diploma: General, Core 40,	departures from patterns, (2) Sampling and Experimentation: Planning and conducting a
Academic Honors, Technical	study, (3) Anticipating Patterns: Exploring random phenomena using probability and
Honors	simulation, and (4) Statistical Inference: Estimating population parameters and testing
	hypotheses. Students should be aware that this is a college level course and students that
	make satisfactory scores on the College Board Placement Test in the spring may earn
Prerequisite: Pre-AP Algebra 2	college credit.
Qualifies as a quantitative reasoning course	

Calculus AB, Advanced Placement

· · · · · · · · · · · · · · · · · · ·	
Grade Level: 12	This college level course is intended for students who have a thorough knowledge of
Course #: 2562	college preparatory mathematics including algebra, axiomatic geometry, trigonometry, and
Length: Full Year	analytical geometry. Calculus AB is a course in introductory calculus with elementary
Credit(s): Two	functions. Generally, topics include limits, continuity, derivatives, definite integrals, and
Diploma: General, Core 40,	techniques of integration involving rational, trigonometric, logarithmic, and exponential
Academic Honors, Technical	functions. The course should also include applications of the derivative, the integral, and
Honors	theory of calculus. Students making satisfactory scores on the College Board Advanced
Dual Credit Availability	Placement Test in the spring may earn college credit. A graphing calculator is required and considerable computer work will be done. *A complete list of topics is available from the Advanced Placement Course Description Booklet. **Teacher recommendation required.
Prerequisite: Pre-Calculus Pre-	
AP or Pre-Calculus, with	
instructor permission	
Qualifies as a quantitative reasoning course	

Calculus BC, Advanced Placement

Grade Level: 12	AP Calculus BC is a college level course intended for the highly prepared high school math
Course #: 2572	student who would like to earn college credit in calculus. With a satisfactory score on the
Length: Full Year	College Board Advanced Placement test, most colleges grant credit and/or advanced
Credit(s): Two	placement for one course level beyond that granted for Calculus AB. The BC course
Diploma: General, Core 40,	includes all AB topics plus considerable advanced material. Additional material includes
Academic Honors, Technical	parametric, polar and vector functions, logistic differential equations, polynomial
Honors	approximations and series. A graphing calculator is required and there is considerable
	computer work. Students are expected to take the College Board Advanced Placement
Prerequisite: Calculus AB,	Test in May.
Advanced Placement	
Qualifies as a quantitative reasoning course	

MULTIDISCIPLINARY

Peer Tutoring

Grade Level: 10-12	Peer Tutoring provides high school students with an organized exploratory experience to
Course #: 0520	assist students in kindergarten through grade twelve (K-12), through a helping
Length: 1 Semester (up to 2	relationship, with their studies and personal growth and development. The course
semesters maximum)	provides opportunities for the students taking the course to develop a basic
Credit(s): 1 credit per semester	understanding of individual differences and to explore career options in related fields.
Diploma: Counts as an Elective	Peer Tutoring experiences are preplanned by the teacher trainer and any cooperating
for all diplomas	teacher under whom the tutoring is to be provided. It must be conducted under the
	supervision of a licensed teacher. The course provides a balance of class work relating
	to the development of and use of: (1) listening skills, (2) communication skills, (3)
Prerequisite: None	facilitation skills, (4) decision-making skills, and (5) teaching strategies.

Jobs for America's Graduates

Grade Level: 11-12	Jobs for America's Graduates (JAG) is a state-based, national non-profit organization
Course #: 0509	dedicated to preventing dropouts among young people who are most at-risk. JAG's
Length: 2 Semesters	mission is to keep young people in school through graduation and provide work-based
Credit(s): Maximum of 4	learning experiences that will lead to career advancement opportunities or to enroll in a
Diploma: Elective for all	postsecondary institution that leads to a rewarding career. JAG students receive adult
diplomas	mentoring while in school and one year of follow-up counseling after graduation. The
	JAG program is funded through grants provided by the Indiana Department of Workforce
Prerequisite: None	Development.

Community Service

Grade Level: 11-12 Course #: 0524 Length: 1 Semester (up to 2 semesters maximum) Credit(s): 1 credit per semester Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Community Service</i> is a course created by public law IC 20-30-14. Community service allows students in grades nine through twelve (HEA 1629) the opportunity to earn up to two high school credits for completion of approved community service projects or volunteer service that "relates to a course in which the student is enrolled or intends to enroll." For each student who wishes to earn credit for community service or volunteer service organization must submit an application to the high school principal including: 1) name of the community service organization or volunteer service organization the student intends to assist; 2) name, address, and telephone number of the director or supervisor of the community service organization or volunteer service organization and, if different from the director or supervisor, the name, address, and telephone number of supervise the student at the activity site; 3) nature of the community service or volunteer service organization to supervise the student at the activity site; 3) nature of the community service organization or volunteer service organization to supervise the student at the activity site; 3) nature of the community service organization to supervise the student at the activity site; 3) nature of the community service organization or volunteer service organization or service organization or volunteer service organization is an accurate reflection of: (a) the student's expectations with regard to the number of hours of service contemplated to be performed; and (b) the community service organization's or the volunteer service organization's need to acquire the student's service; 6) description of: (a) the educational or career exploration benefits the student's service; and benefit the community servi
	expects to gain from the student's participation; 7) the description of how the community
Prerequisite: None	and 10) any other information required by the principal.

Beginning Concert Band

Grade Level: 9-12	This is a moderate level of concert band. Ensemble and solo activities are designed to
Course #: 4160	develop elements of musicianship including: (1) tone production, (2) technical skills, (3)
Length: Full Year	intonation, (4) music reading skills, (5) listening skills, (6) analyzing music, and (7) studying
Credit(s): Two	historically significant styles of literature. This group will perform at many functions and
Diploma: Counts as a Directed	perform at least two concerts during the school year as well as the district concert band
Elective or Elective for all	contest in April. Participation in solo ensemble contest is encouraged. Previous
diplomas	participation in middle school band or its equivalent is suggested but not required.
	Members of this group will be part of the marching band during the first nine weeks or will
Prerequisite: By Audition	be required to complete alternative projects designated by the band director.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Intermediate Concert Band

Grade Level: 10-12	This is an Intermediate Concert Band course which further develops elements of
Course #: 4168	musicianship in the following areas: (1) tone production, (2) technical skills, (3) intonation,
Length: Full Year	(4) music reading skills, (5) listening skills, (6) analyzing music, and (7) studying
Credit(s): Two	historically significant styles of literature. The band will present three or four concerts per
Diploma: Counts as a Directed	year and perform in the district concert band contest in April. Participation in solo

Chorus	scheduled for this group.
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Madrigal Choir and Vocal Jazz

Grade Level: 10-12 Course #: 4180 Length: Madrigal Sem. 1 Vocal Jazz Sem. 2	Madrigal Choir and Vocal Jazz – Choral Chamber Ensemble (CHRL ENSEM) is based on the Indiana Academic Standards for High School Choral Music. Students' musicianship and specific performance skills in this course are enhanced through specialized small group instruction. The activities expand the repertoire of a specific genre. Chamber
Credit(s): One per semester Diploma: General, Core 40, Academic Honors, Technical Honors	ensemble classes provide instruction in creating, performing, listening to, and analyzing music in addition to focusing on specific subject matter. Students develop the ability to understand and convey the composer's intent in performance of music. Time outside of the school day may be scheduled for rehearsals and performances. A limited number of
Prerequisite: Advanced Choir	public performances may serve as a culmination of daily rehearsal and musical goals. Students are required to participate in performance opportunities outside of the school day that support and extend learning in the classroom.

Dance Performance: Ballet, Modern, Jazz, or Ethnic-Folk I

Grade Level: 9-12 Course #: 4146A Length: One Semester Credit(s): One Diploma: Counts as a Directed Elective or Elective for all Diplomas	This class will provide learning experiences that will develop techniques appropriate within modern and jazz genres. Sequential and systematic learning activities are designed to develop the ability to express thoughts, perceptions, feelings, and images through movement. Activities utilize a wide variety of materials and experiences and are designed to develop techniques appropriate to the genre including individual and group instruction in performance repertoire and skills. The class provides the opportunity for students to experience degrees of physical prowess, technique, and flexibility. Furthermore, students study dance performance as an artistic discipline and as a form of artistic communication. Students will be able to describe, analyze, interpret, and judge dance performances within the genre. Auditions are held in the spring for entrance into the performing section of the
Prerequisite: None	class.
Fulfills	a Fine Arts requirement for the Core 40 Academic Honors Diploma

Dance Performance: Ballet, Modern, Jazz, or Ethnic-Folk II

Grade Level: 9-12 Course #: 4146B Length: One Semester Credit(s): One Diploma: Counts as a Directed Elective or Elective for all Diplomas	A wide variety of materials and experiences are used in order to provide students with the knowledge, skills and appreciation of multi-styled dance expressions. Choreographic activities provide students opportunities to participate in roles as a soloist, a choreographer or leader, and in a subject role. Students also explore a variety of choreographic philosophies as well as administrative and media skills necessary for the promotion and documentation of works to be performed. Auditions are held in the spring for entrance into the competing section of the class.
Prerequisite: Dance Performance: Ballet, Modern, Jazz, or Ethnic-Folk 4146A	a Fine Arts requirement for the Core 40 Academic Honors Diploma

Music History and Appreciation

Grade Level: 11-12 Course #: 4206 Length: 1 Semester Credit(s): One Diploma: Counts as a Directed Elective or Elective for all	This course provides an introduction to the principles of intelligent listening to music through recordings and live vocal and instrumental performances. Basic elements of music form, instrument recognition, rhythmic elements, and structural features of music are studied.
diplomas Prerequisite: None	
Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma	

Music Theory and Composition

Grade Level: 11-12 Course #: 4208 Length: 1 Semester Credit(s): One Diploma: Counts as a Directed Elective or Elective for all diplomas	<i>Music Theory</i> is planned for students seriously interested in harmony and composition in music education. This course is not only designed for students who intend to make music their career but also for those who are interested in music as an avocation.
Prerequisite: None	
Fulfills a	a Fine Arts requirement for the Core 40 Academic Honors Diploma

Anatomy and Physiology

Grade level: 11-12	Anatomy & Physiology is a course in which students investigate concepts related to Health
Course#: 5276	Science, with emphasis on interdependence of systems and contributions of each system
Length: Full year	to the maintenance of a healthy body. It introduces students to the cell, which is the basic
Credit(s): Two	structural and functional unit of all organisms, and covers tissues, integument, skeleton,
Diploma: Counts as a Directed	muscular and nervous systems as an integrated unit. Through instruction, including
Elective or Elective for all	laboratory activities, students apply concepts associated with Human Anatomy &
diplomas	Physiology. Students will understand the structure, organization and function of the various components of the healthy body in order to apply this knowledge in all health related fields.
Dual Credit Availability	
Prerequisite: Biology I	
Fulfills a Core 40 Science course requirement for all diplomas	

Biology I

Grade level: 9-10 Course #: 3024 Length: Full year Credit(s): Two Diploma: General, Core 40, Academic Honors, Technical Honors	<i>Biology I</i> is a course based on the following core topics: cellular; structure and function; matter cycles and energy transfer; interdependence; inheritance and variation traits; evolution. Instruction should focus on developing student understanding that scientific knowledge is gained from observation of natural phenomena and experimentation by designing and conducting investigations guided by the Science and Engineering Practices (SEPS) and cross-cutting concepts.
Prerequisite: None	
Fulfills the Biology requirement for all diplomas	

Biology I, Pre-AP

Grade level: 9	Pre-AP Biology I is a course based on the following core topics: cellular chemistry,
Course #: 3024T	structure and reproduction; matter cycles and energy transfer; interdependence of
Length: Full year	organisms; molecular basis of heredity; genetics and evolution. Instruction should focus on
Credit(s): Two	developing student understanding that scientific knowledge is gained from observation of
Diploma: General, Core 40,	natural phenomena and experimentation by designing and conducting investigations
Academic Honors, Technical	guided by theory and by evaluating and communicating the results of those investigations
Honors	according to accepted procedures. Some topics are covered in more depth than Biology I.
	In order to develop a student's ability in applying the scientific method to solve a problem,
Prerequisite: None	a research project will be required and presented at a science fair.
Fulfills the Biology requirement for all diplomas	

Biology II, General

Grade level: 10-12	Biology II is an advanced laboratory, field, and literature investigations-based course.
Course #: 3026	Students enrolled in Biology II examine in greater depth the structures, functions, and
Length: Full year	processes of living organisms. Students also analyze and describe the relationship of
Credit(s): Two	Earth's living organisms to each other and to the environment in which they live. In this
Diploma: Counts as an	course, students refine their scientific inquiry skills as they collaboratively and
Elective for all diplomas	independently apply their knowledge of the unifying themes of biology to biological questions and problems related to personal and community issues in the life sciences.
Dual Credit Availability

Chemistry, Advanced Placement

Grade level: 12 Course #: 3060 Length: Full year Credit(s): Two Diploma: Counts as a Science course for all diplomas Prerequisite: Chemistry I, College Algebra or Pre- Calculus/Trigonometry Pre-AP	<i>AP Chemistry</i> is a course based on the content established and copyrighted by the College Board. The course is not intended to be used as a dual credit course. The content includes: (1) structure of matter: atomic theory and structure, chemical bonding, molecular models, nuclear chemistry; (2) states of matter: gasses, liquids and solids, solutions; and (3) reactions: reaction types, stoichiometry, equilibrium, kinetics and thermodynamics.
Qualifies as a quantitative reasoning course	

Earth and Space Science I

Grade Level: 9-12 Course #: 3044 Length: Full Year Credit(s): Two Diploma: Counts as an Elective for all diplomas	<i>Earth and Space Science I</i> is a course focused on the following core topics: universe; solar system; Earth cycles and systems; atmosphere and hydrosphere; solid Earth; Earth processes. Students analyze and describe earth's interconnected systems and examine how earth's materials, landforms, and continents are modified across geological time. Instruction should focus on developing student understanding that scientific knowledge is gained from observation of natural phenomena and experimentation, by designing and conducting investigations guided by the Science and Engineering Practices (SEPS) and
Prerequisite: None	cross-cutting concepts.
Fulfills a Core 40 Science course requirement for all diplomas	

Advanced Science, Earth and Space Science II

Grade Level: 11-12	Earth and Space Science II is an extended laboratory, field, and literature investigations-
Course #: 3046	based course whereby students apply concepts from other scientific disciplines in
Length: Full Year	synthesizing theoretical models of Earth and its interactions with the macrocosm.
Credit(s): Two	Students enrolled in this course examine various Earth and space science phenomena,
Diploma: Counts as an	such as the structure, composition, and interconnected systems of Earth and the various
Elective for all diplomas;	processes that shape it, as well as Earth's lithosphere, atmosphere, hydrosphere, and
	celestial environment. Students analyze and apply the unifying themes of Earth and space
Prerequisite: Earth and Space	science as part of scientific inquiry aimed at investigating Earth and space science
Science I	problems related to personal needs and community issues.
Fulfills a Core 40 Science course requirement for all diplomas	

Environmental Science

Grade level: 11-12	Environmental Science is an interdisciplinary course that integrates biology, earth science,
Course #: 3010	chemistry, and other disciplines. Students completing Environmental Science, acquire the
Length: Full year	essential tools for understanding the complexities of national and global environmental
Credit(s): Two	systems. Students enrolled in this course conduct in-depth scientific studies of
Diploma: Counts as an Elective	environmental systems, flow of matter and energy, natural disasters, environmental
for all diplomas	policies, biodiversity, population, pollution, and natural and anthropogenic resource cycles.
	Cross-cutting concepts are an integral part of this course. Students formulate, design, and
Prerequisite: ICP or Chemistry	carry out laboratory and field investigations as an essential course component using the
I, and Biology I	Science and Engineering Practices.
Fulfills a Core 40 Science (life) course requirement for all diplomas	

Integrated Chemistry-Physics

Grade level: 9 Course #: 3108 Length: Full year Credit(s): Two Diploma: Counts as an Elective for all diplomas	Integrated Chemistry-Physics is a course focused on the following core topics: constant velocity; uniform acceleration; Newton's Laws of motion (one dimension); energy; particle theory of matter; describing substances; representing chemical change; electricity and magnetism; waves; nuclear energy. Instruction should focus on developing student understanding that scientific knowledge is gained from observation of natural phenomena and experimentation using the Science and Engineering Practices (SEPS) and cross-cutting concepts.
Prerequisite: Algebra I or may	
be taken concurrently	
Fulfills a Core 40 Science (physical) course requirement for all diplomas	
Qualifies as a quantitative reasoning course	

Life Science (L)

Grade Level: 9-10 Course #: 3030 Length: 1 Semester Credit(s): One Diploma: Counts as a science course for the General diploma only. Counts as an Elective for the core 40, Academic Honors, Technical Honors	<i>Life Science</i> is an introduction to the biology course. Students develop problem-solving skills and strategies while performing laboratory and field investigations of fundamental biological concepts and principles. Students explore the functions and processes of cells within all living organisms, the sources and patterns of genetic inheritance and variation leading to biodiversity, and the relationships of living organisms to each other and to the environment as a whole.
Prerequisites: None	
Fulfills science requirement for all diplomas	

Physical Science (L)

Grade Level: 9-10 Course #: 3102 Length: 1 Semester Credit(s): One Diploma: Counts toward the physical science requirement for the General diploma. Counts as an Elective for the core 40, Academic Honors, Technical Honors	<i>Physical Science</i> is a course in which students develop problem solving skills and strategies while performing laboratory and field investigations of fundamental chemical, physical, and related Earth and space science concepts and principles that are related to students' interests and that address everyday problems. Students enrolled in Physical Science will explore the structure and properties of matter, the nature of energy and its role in chemical reactions and the physical and chemical laws that govern Earth's interconnected systems and forces of nature.
Prerequisites: None	
Fulfills science requirement for all diplomas	

Physics I

Grade level: 10-12 Course #: 3084 Length: Full year Credit(s): Two Diploma: Counts as an Elective for all diplomas Prerequisite: Algebra II (may be taken concurrently) and ICP or Chemistry I is recommended	<i>Physics I</i> is a course focused on the following core topics: constant velocity; constant acceleration; forces; energy; linear momentum in one dimension; simple harmonic oscillating systems; mechanical waves and sound; simple circuit analysis. Instruction should focus on developing student understanding that scientific knowledge is gained from observation of natural phenomena and experimentation using the Science and Engineering Practices (SEPS) and cross-cutting concepts.
Fulfills a Core 40 Science (physical) course requirement for all diplomas	
Qualifies as a quantitative reasoning course	

Physics I Algebra-Based, Advanced Placement (L)

Grade level: 10-12 Course #: 3080 Length: Full Year Credit(s): Two Diploma: Counts as a Science Course for all diplomas; General, Core 40, Academic Honors, Technical Honors	<i>AP Physics I</i> is a course based on the content established and copyrighted by the College Board. The course is not intended to be used as a dual credit course. AP Physics 1: Algebra-based is equivalent to a first-semester college course in algebra-based physics. The course covers Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; mechanical waves and sound. It will also introduce electric.
Prerequisites: Algebra II (may be concurrent); ICP or	
Chemistry I is recommended	
Qualifies as a quantitative reasoning course	

Physics II Algebra-Based, Advanced Placement (L)

Grade level: 11-12 Course #: 3081 Length: Full Year Credit(s): Two Diploma: Counts as a Science Course for all diplomas:	AP Physics II is a course based on the content established and copyrighted by the College Board. The course is not intended to be used as a dual credit course. AP Physics 2: Algebra-based is equivalent to a second-semester college course in algebra-based physics. The course covers fluid mechanics; thermodynamics; electricity and magnetism; optics; atomic and nuclear physics.
Credit(s): Two	physics. The course covers fluid mechanics; thermodynamics; electricity and magnetism;
General, Core 40, Academic Honors, Technical Honors	
Prerequisites: AP Physics I; Algebra based	
	Qualifies as a quantitative reasoning course

Physics II

Grade level: 11-12	Physics II is an extended laboratory, field, and literature investigations-based course.
Course #: 3086	Students enrolled in Physics II investigate physical phenomena and the theoretical models
Length: Full Year	that are useful in understanding the interacting systems of the macro- and microcosms.
Credit(s): Two	Students extensively explore the unifying themes of physics, including such topics and
Diploma: Counts as an elective	applications of physics as: energy and momentum in two dimensions; temperature and
for all diplomas.	thermal energy transfer; fluids; electricity; simple and complex circuits; magnetism;
	electromagnetic inductions; geometric optics; particle and wave nature of light; and
Recommended Prerequisites:	modern physics. Use of laboratory activities aimed at investigating physics questions and

concurrent)	
Qualifies as a quantitative reasoning course	

Advanced Science, Special Topics (L)

Grade level: 12	Advanced Science, Special Topics is any science course which is grounded in extended
Course #: 3092	laboratory, field, and literature investigations into one or more specialized science
Length: Full Year	disciplines, such as anatomy/physiology, astronomy, biochemistry, botany, ecology,
Credit(s): Two	electromagnetism, genetics, geology, nuclear physics, organic chemistry, etc. Students
Diploma: Counts as a Science	enrolled in this course engage in an in-depth study of the application of science concepts,
Course for all diplomas;	principles, and unifying themes that are unique to that particular science discipline and that
General, Core 40, Academic	address specific technological, environmental or health-related issues. Under the direction
Honors, Technical Honors	of a science advisor, students enrolled in this course will complete an end-of-course
	project and presentation, such as a scientific research paper or science fair project,
	integrating knowledge, skills, and concepts from the student's course of study. Individual
Prerequisite: at least 3 years of	projects are preferred, but group projects may be appropriate if each student in the group
Core 40 Science courses	has specific and unique responsibilities.

Advanced Science: Forensic Science

Grade Level: 11-12 Course #: 3092 Length: 2 Semesters Credit(s): 1 credit per sem., 2	<i>Forensic science</i> is the application of science to criminal and civil laws during criminal investigations, as governed by the legal standards of admissible evidence and criminal procedure. This course is a laboratory based, exploratory course that encompasses the subjects of chemistry, biology, geology, physics, and psychology as they apply to the
credits maximum Diploma: Counts as a Science	criminal justice system. Students will gain an understanding of the history of forensics, apply the knowledge and technology of science to the definition and enforcement of laws,
course for all diplomas; General, Core 40, Academic Honors,	and study the professions that use their skills to help law enforcement officials conduct their investigations. Students enrolled in this course will explore high-profile criminal case
Technical Honors	studies and conduct various investigations, including death investigations, that will immerse students in topics such as fingerprint analysis, ballistics, hair and fiber analysis, toxicology, DNA testing, and blood spatter as a way to explore how science is utilized within the law enforcement community and the American legal system. Under the
Recommended Prerequisite: Biology I; ICP/Chemistry I	direction of their science teacher, students will complete an end-of-course project and presentation.

Science Tutorial

Grade level: 9-12 Course #: 3094 Length: 1 Semester Credit(s): 1 credit per semester, 8 credits maximum Diploma: Counts as an elective for all diplomas	Science Tutorial provides students with individualized instruction designed to support success in completing Core 40 science coursework for each year that they are enrolled in Core 40 science courses.
Prerequisite: This course must be taken concurrently with a Core 40 science course	

Current Problems/Issues/Events

Grade Level: 9-12	This is a one semester course for freshman, sophomore, junior and senior level students.
Course #: 1512	This course provides opportunities to apply techniques of investigation and inquiry to the
Length: 1 Semester	study of significant problems or issues. Students will develop competence in 1) recognizing
Credit(s): One	cause and effect relationships, (2) recognize fallacies in reasoning and propaganda devices,
Diploma: Counts as an elective	(3) organize knowledge into useful patterns, (4) state and test theories, and (5) generalize
for all diplomas	based on evidence. Students will expand their reading comprehension skills by using a
	weekly news magazine (and other forms of media) in lieu of a textbook.
Drevery visites News	weeky news magazine (and other forms of media) in neu of a textbook.
Prerequisite: None	

Indiana Studies

One de Laviel 0.40	This are a second to a second in the second of the second second second sector of the ladies are d

for all diplomas;	personalities and legends are included in the content. Field trips are incorporated into the
	semester. Indiana geography and a study of Clay County are also included.
Prerequisite: None	

Geography and History of the World

Grade Level: 9-12 Course #: 1570 Length: Full Year Credit(s): Two Diploma: Counts as a Social Studies requirement for the General diploma. Counts as an Elective for all diplomas	Students enrolled in this course will develop and use the six elements of geography to better understand current events and issues facing the world today. The elements will include the world in spatial terms, places and regions, physical systems, human systems, environment and society, and the uses of geography. Students will demonstrate an understanding of these elements of geography in a context of world history, primarily from 1450 to present. Class projects will include gathering and disseminating information on governments, economies, cultures, activities, and belief systems of various societies. Students will gather information using a variety of sources.
Prerequisite: None	
Fulfills the Geography History of the World / World History and Civilization graduation requirement for the Core 40, Academic Honors and Technical Honors Diplomas	

World History/Civilization

Grade Level: 10-12 Course #: 1548 Length: Full Year Credit(s): Two Diploma: Counts as an Elective for all diplomas	This two semester course emphasizes events and developments in the past that greatly affected large numbers of people across broad areas of earth and that significantly influenced people and places in subsequent eras. Students will be expected to practice historical thinking and inquiry skills. They will also compare and contrast events and developments involving diverse peoples and civilizations in different regions of the world, examine examples of continuity and change, universality and particularity, and unity and diversity among peoples and cultures from the past to the present.
Prerequisite: None	diversity among peoples and cultures norm the past to the present.
Fulfills the Geography History of the World / World History and Civilization graduation requirement for the Core 40, Academic Honors and Technical Honors Diplomas	

World History/Civilization, Pre-AP

Grade Level: 9-12	This two semester course emphasizes events and developments in the past that greatly

Fulfills the Geography History	of the World / World History and Civilization graduation requirement for the Core 40, Academic
	Honors and Technical Honors Diplomas

Topics in History: The Early United States

Grade Level: 9-12 Course #: 1538AT Length: 1 Semester Credit(s): One Diploma: Counts as an Elective for all diplomas	This course is designed to familiarize students with historical events and concepts of the Pre- Civil War Era of American History. Emphasis will be placed on how events in this period laid the foundation for future growth and development of the nation. The development of historical research skills using primary and secondary sources will be emphasized. *This course is a recommended prerequisite for United States History, Advanced Placement.
Prerequisite: None	

Topics in History: Advanced Placement, Enrichment Social Studies

Grade Level: 10-12 Course #: 1538CT Length: 1 Semester (Spring only) Credit(s): One Diploma: Counts as an Elective for all diplomas	This course will be offered in the spring semester only, and is for those students enrolled in AP European or AP United States History. It is designed to support those students in their writing and test taking skills. They will analyze primary source documents and techniques in how to interpret them, as well as, using those documents in writing of a Document Based Question (DBQ). Instruction will guide students through the writing of historical essays and test taking techniques that will aid them during the AP Exam. It will supplement the learning that occurs in the classroom and offers additional time to collaborate with peers and teacher.
Prerequisite: Enrolled in: AP US History, AP European History	

Topics in History: United States History through Film

Grade Level: 10-12	Since the turn of the 20 th century, motion pictures have been one of the most universal
Course #: 1538DT	means of entertainment and culture. For this reason, movies have also become one of the
Length: 1 Semester	most vital and widespread methods of interpreting the past. The films chosen for this class
Credit(s): One	are presentations of history rather than documentations of history. That is, they are
Diploma: Counts as an	reenactments of historical events rather than documentary records of events. These films
Elective for all diplomas	may present historical content in two ways:
	1) As a factual record: Film is used to dramatize what happened in the past.
	2) To convey atmosphere: The use of fiction to convey a sense of the past
	, , , , , , , , , , , , , , , , , , , ,
	life-styles, values, or beliefs.
	This course is a semester elective course. Because of the nature of the course and the
	amount of time that must be dedicated to screening films, this class will be very different than
	a traditional lecture-based course. It requires students to be self-motivated learners.
	Students will be required to write detailed critiques of the films, reaction papers over the
	topics and weekly discussions. Students who feel more comfortable in lecture classes
Prerequisite: None	should be advised that this class might not be well suited to their needs.

European History, Advanced Placement

Grade Level: 10-12 Course #: 1556 Length: Full Year Credit(s): Two Diploma: Counts as an Elective for all diplomas;	European History students investigate significant events, individuals, developments, and processes in four historical periods from approximately 1450 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing historical evidence; contextualization; comparison; causation; change and continuity over time; and argument development. The course also provides six themes that students
Prerequisite: World History Recommended; Students should be able to read a college level textbook and write grammatically correct sentences	explore throughout the course in order to make connections among historical developments in different times and places: interaction of Europe and the world; poverty and prosperity; objective knowledge and subjective visions; states and other institutions of power; individual and society; and national and European identity.

United States History: The Twentieth Century

Grade Level: 11 Course #: 1542 Length: Full Year Credit(s): Two Diploma: General, Core 40, Academic Honors, Technical Honors Dual Credit Availability	This is a two semester course which builds upon concepts developed in previous studies of American history. In this course, students will be given the opportunity to identify and review significant events and movements in the early development of the nation. After providing such a review, the course gives major emphasis to the interaction of historical events and geographic, social, and economic influences on national development in the late nineteenth and twentieth century.
Prerequisite: None	
Fulfills the US History re	equirement for all diplomas; General, Core 40, Academic Honors, Technical Honors

United States History: Advanced Placement

Grade Level: 11	This course follows the College Board Entrance Examination guidelines for advanced
Course #: 1562	placement in United States History. The design of this course is to aid the student in their
Length: Full Year	quest for information concerning American history. Emphasis will be on student
Credit(s): Two	participation in the research of basic concepts concerning American history and the
Diploma: General, Core 40,	evaluation of that material by the use of a variety of methods. Students will be expected to
Academic Honors, Technical	formulate opinions, evaluate various points of view and arrive at a conclusion concerning
Honors	the concept under study. While the basic information concerning American history will be
	covered, the emphasis will be on evaluating, synthesizing, and producing an educational
Dual Credit Availability	product concerning the concepts under discussion. Activities will include field trips and
	other projects stressing the use of primary sources. Students will be expected to read
Prerequisite: Recommended:	challenging texts for summer reading.
Topics in Early United States	
History	
Fulfills the US History re	equirement for all diplomas; General, Core 40, Academic Honors, Technical Honors

Psychology

Grade Level: 11-12	This one semester class provides an opportunity to study individual and social psychology
Course #: 1532	and how the knowledge and methods of psychologists are applied to the solution of human
Length: 1 Semester	problems. Content for the course will include study of the scientific method, principles of
Credit(s): One	human learning and physical, mental, and social factors affecting human behavior. The
Diploma: Counts as an	course is designed to help each student become aware of herself/himself as an individual in
Elective for all diplomas	today's society.
Prerequisite: None	

Psychology, Advanced Placement

Grade Level: 11-12 Course #: 1558 Length: 1 Semester Credit(s): One Diploma: Counts as an Elective for all diplomas; General, Core 40, Academic Honors, Technical Honors	This course will provide students with the content established by the College Board. Topics will include history and approaches, research methods, biological bases of behavior, sensation and perception, states of consciousness, learning, cognition, motivation and emotion, developmental psychology, personality, testing and individual differences, abnormal psychology, treatment of psychological disorders, and social psychology.
Prerequisite: Psychology I	

Sociology

Grade Level: 11-12 Course #: 1534 Length: 1 Semester Credit(s): One Diploma: Counts as an Elective for all diplomas	This one semester course provides an opportunity for students to study group behavior and basic human institutions. Broad areas of content include the study of institutions found in all societies, such as the family, religious, community organizations, political and social groups, and leisure time organizations. Moral values, traditions, folkways, the mobility of people, and other factors in society which influence group behavior are also studied.
Prerequisite: None	

Economics

Grade Level: 12 Course #: 1514A Length: 1 Semester Credit(s): One Diploma: General, Core 40, Academic Honors, Technical Honors Prerequisite: None	This one semester required course investigates the specific economic effect of market forces and government policies on individuals and the major institutional groups, such as business and labor in the economy. Special attention is given to economic concepts and principles used by consumers, producers, and voters.
FL	Ifills a Social Studies requirement for the General Diploma only
Fulfills the Economic	s requirement for the Core 40, Academic Honors and Technical Honors Diplomas

Hybrid Economics

Grade Level: 12	This class meets the graduation requirements and state content standards for <i>Economics</i> ,
Course #: 1514B	but does so in a non-traditional fashion. The class will be scheduled at the beginning or
Length: 1 Semester	ending of the school day, and students will only be required to attend class two days a week
Credit(s): One	maximum. One day will be used to review and discuss content or to assess student
Diploma: Counts as an	learning. The other day will be used to host speakers from the surrounding area on a variety
Elective for all diplomas	of economic topics. The other days of the week, students should be working on assignments and learning independently. The teacher will be available during the hybrid class period on
	all school days for any one-on-one help or further clarification as needed.
	Content Outline/Topics of Study: Scarcity, Factors of Products, Entrepreneurs, Supply,
	Demand, Prices, Market Structures, Business Structures, Taxes, Revenues, Fiscal and
	Monetary Policy, The Federal Reserve, Gross Domestic Product, Economic Growth,
Prerequisite: Algebra I	Inflation, The Business Cycle
	Fulfills a Social Studies requirement for the General Diploma only
Fulfills the Econor	mics requirement for the Core 40, Academic Honors and Technical Honors Diplomas

AP Microeconomics

Grade Level: 12 Course #: 1566 Length: 1 Semester Credit(s): One Diploma: Counts as an elective for General, Core 40, Academic Honors, Technical Honors	The purpose of the <i>AP</i> course in <i>Microeconomics</i> is to give students a thorough understanding of the principles of economics that relates to individual decision makers (consumers & producers). The course will cover basic economic concepts, factor and product markets, market failures and the role of government in the economy. This course may be taken in place of Economics #1514A or #1514B to satisfy the graduation requirement.
Prereguisite: None	
Fulfills a Social Studies requirement for the General Diploma	
Fulfills the Econom	nics requirement for the Core 40, Academic Honors, Technical Honors Diploma
	Qualifies as a quantitative reasoning course

United States Government

Grade Level: 12	United States Government provides a framework for understanding the purposes,
Course #: 1540	principles, and practices of constitutional representative democracy in the United States.
Length: 1 Semester	Responsible and effective participation of citizens is stressed. Students understand the
Credit(s): One	nature of citizenship, politics, and governments and understand the rights and
Diploma: General, Core 40,	responsibilities of citizens and how these are part of local, state and national government.
Academic Honors, Technical	Students examine how the United States Constitution protects the rights and provides the
Honors	structure and functions of various levels of government. Analysis of how the United States
	interacts with other nations and the government's role in world affairs is included in this
	course. Using primary and secondary resources, students will articulate, evaluate, and
	defend positions on political issues. As a result, they will be able to explain the role of
	individuals and groups in government, politics, and civic activities and the need for civic and
	political engagement of citizens in the United States.
	NOTE: Students are required to take the naturalization test for citizenship per SEA
Prereguisite: None	132 (New 2019-2020)
Fulfills the Government requ	irement for all diplomas; General, Core 40, Academic Honors, Technical Honors Diplomas

AP United States Government and Politics

Grade Level: 12 Course #: 1560 Length: 1 Semester Credit(s): One Diploma: General, Core 40, Academic Honors, Technical Honors	AP United States Government and Politics is a course based on the content established and copyrighted by the College Board. The course is not intended to be used as a dual credit course. AP U.S. Government and Politics provides a college-level, nonpartisan introduction to key political concepts, ideas, institutions, policies, interactions, roles, and behaviors that characterize the constitutional system and political culture of the United States. Students study U.S. foundational documents, Supreme Court decisions, and other texts and visuals to gain an understanding of the relationships and interactions among political institutions, processes, and behavior. They also engage in disciplinary practices that require them to read and interpret data, make comparisons and applications, and develop evidence-based arguments. In addition, they complete a political science research or applied civics project.
Prerequisite: None	correct sentences.
	Fulfills the government requirement for all diplomas

Principles of Automotive Engineering

Grade Level: 11-12 Course #: 7213B Length: 2 Semesters Credit(s): Two Diploma: Counts as a Directed Elective for all diplomas	This course gives students an overview of the operating and general maintenance systems of the modern automobile. Students will be introduced to the safety and operation of equipment and tools used in the automotive industry. Students will study the maintenance and light repair of automotive systems. Also, this course gives students an overview of the electrical operating systems of the modern automobile. Students will be introduced to the safety and operation of equipment and tools used in the electrical diagnosis and repair in
Dual Credit Availability	the automotive electrical industry. Students will study the fundamentals of electricity and automotive electronics.
Prerequisite: None	

STUDENTS WILL TAKE PRINCIPLES OF AUTOMOTIVE SERVICES CONCURRENTLY WITH BRAKE SYSTEMS, AND STEERING AND SUSPENSION COURSES.

Principles of Automotive Services

Grade Level: 9-11 Course #: 7213 Length: 2 Semesters Credit(s): 1 Credit per Semester; 2 Credits Maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability Prereguisite: None	This course gives students an overview of the operating and general maintenance systems of the modern automobile. Students will be introduced to the safety and operation of equipment and tools used in the automotive industry. Students will study the maintenance and light repair of automotive systems. Also, this course gives students an overview of the electrical operating systems of the modern automobile. Students will be introduced to the safety and operation of equipment and tools used in the electrical diagnosis and repair in the automotive electrical industry. Students will study the fundamentals of electricity and automotive electronics.
---	---

Brake Systems

Grade Level: 10-12 Course #: 7205 Length: 2 Semesters Credit(s): 1 Credit per Semester; 2 Credits Maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	This course gives students an in-depth study of vehicle electrical systems. Students will study the fundamentals of electricity and automotive electronics in various automotive systems. Additionally, it teaches theory, service and repair of automotive braking systems. This course provides an overview of various mechanical brake systems used on today's automobiles. This course will emphasize professional diagnosis and repair methods for brake systems.
Dual Credit Availability	
Required Prerequisite: Principles of Automotive Services, will be taken concurrently	
CTE Concentrator A – Automotive Services Pathway	

Steering and Suspension

Grade Level: 10-12 Course #: 7212 Length: 2 Semesters Credit(s): 1 Credit per Semester; 2 Credits Maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability	This course takes an in-depth look at engine performance, including concepts in the diagnosis and repair of ignition, fuel, emission and related computer networks. This course presents engine theory and operation and studies the various engine designs utilized today. This course also takes an in-depth look at engine performance, including advanced concepts in the diagnosis and repair of ignition, fuel, emission and related computer networks. This course presents engine theory and operation and studies the various engine designs utilized today. This course presents engine theory and operation and studies the various engine designs utilized today. Hybrid/Alternative fuel technology will also be introduced.
Dual Credit Availability Required Prerequisite: Principles of Automotive Services and Brake Systems, will be taken concurrently	
CTE Concentrator B – Automotive Services Pathway	

Automotive Capstone

Grade Level: 12	This course includes advanced training with more emphasis placed on diagnostics and
Course #: 7375	troubleshooting. This course is articulated with Ivy Tech State College. Students earning a B
Length: Full Yr.	or better in the class are eligible to receive 9 college credits through Ivy Tech Community
Credit(s): 6	College. Students can earn 2 hours of dual credit at Vincennes University.
Diploma: Counts as a

Automotive Services; Brake	
Systems; and Steering and	
Suspension	

STUDENTS WILL TAKE PRINCIPLES OF CONSTRUCTION TRADES CONCURRENTLY WITH CONSTRUCTION TRADES: GENERAL CARPENTRY AND CONSTRUCTION TRADES: FRAMING AND FINISHING COURSES.

Principles of Construction Trades

Grade Level: 9-11 Course #: 7130 Length: 2 Semesters Credit(s): 1 credit per Semester; 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Principles of Construction Trades</i> prepares students with the basic skills needed to continue in a construction trade field. Topics will include an introduction to the types and uses for common hand and power tools, learn the types and basic terminology associated with construction drawings, and basic safety. Additionally students will study the roles of individuals and companies within the construction industry and reinforce mathematical and communication skills necessary to be successful in the construction field.
Prerequisite: None	

Construction Trades: General Carpentry

Grade Level: 10-12 Course #: 7123 Length: 2 Semesters Credit(s): 1 credit per Semester; 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Construction Trades: General Carpentry</i> builds upon the skills learned in the Principles of Construction Trades and examines the basics of framing. This includes studying the procedures for laying out and constructing floor systems, wall systems, ceiling joist and roof framing, and basic stair layout. Additionally, students will be introduced to building envelope systems.
Required Prerequisite: Principles of Construction Trades, will be taken concurrently	
	CTE Concentrator A – Construction Trades Pathway

Construction Trades: Framing and Finishing

Grade Level: 10-12 Course #: 7122 Length: 2 Semesters Credit(s): 1 credit per Semester; 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas	<i>Construction Trades: Framing and Finishing</i> prepares students with advanced framing skills along with interior and exterior finishing techniques. Topics include roofing applications, thermal and moisture protection, exterior finishing, cold-formed steel framing, drywall installation and finishing, doors and door hardware, suspended ceilings, window, door, floor, and ceiling trim, and cabinet installation.
Required Prerequisite: Principles of Construction Trades and Construction Trades: General Carpentry, will be taken concurrently	
CTE Concentrator B – Construction Trades Pathway	

Construction Trades Capstone

Grade Level: 11-12 Course #: 7242 Length: 2 Semesters Credit(s): 1-3 per semester, 6 maximum Diploma: Counts as a Directed Elective or Elective for all diplomas	Students enrolled in this course will be involved with material calculations and activities which require greater depth of knowledge and ability. Students will also be expected to begin to identify with a specialty area which is of particular interest. At the conclusion of the program each student will have experienced the activities related to building a house in addition to being able to demonstrate proficiency in a specialty area.
Prerequisite(s): Principles of Construction Trades; Construction Trades: General Carpentry; and Construction Trades: Framing and Finishing	
Counts as a quantitative reasoning course	

STUDENTS WILL TAKE PRINCIPLES OF WELDING TECHNOLOGY CONCURRENTLY WITH SHIELDED METAL ARC WELDING COURSE.

Principles of Welding Technology

Grade Level: 9-11	Principles of Welding Technology includes classroom and laboratory experiences that
Course #: 7110	develop a variety of skills in oxy-fuel cutting and basic welding. This course is designed for
Length: 2 Semesters	individuals who intend to make a career as a Welder, Technician, Designer, Researcher, or
Credit(s): 1 credit per	Engineer. Emphasis is placed on safety at all times. OSHA standards and guidelines
Semester; 2 credits maximum	endorsed by the American Welding Society (AWS) are used. Instructional activities

Shielded Metal Arc Welding

Grade Level: 10-12 Course #: 7111 Length: 2 Semesters Credit(s): 1 credit per Semester; 2 credits maximum Diploma: Counts as a Directed Elective or Elective for all Diplomas Dual Credit Availability	Shielded Metal Arc Welding involves the theory and application of the Shielded Metal Arc Welding process. Process theory will include basic electricity, power sources, electrode selection, and all aspects pertaining to equipment operation and maintenance. Laboratory welds will be performed in basic weld joints with a variety of electrodes in the flat, horizontal and vertical positions. Emphasis will be placed on developing the basic skills necessary to comply with AWS industry standards.
Prerequisite: Principles of Welding Technology, will be taken concurrently	
2	CTE Concentrator A – Welding Pathway

Gas Welding Processes

Grade Level: 10-12 Course #: 7101 Length: 2 Semesters Credit(s): 1 per sem., 2 maximum Diploma: Counts as a Directed Elective or Elective for all diplomas	Gas Welding Processes is designed to cover the operation of Gas Metal Arc Welding (MIG) equipment. This will include all settings, adjustments and maintenance needed to weld with a wire feed system. Instruction on both short-arc and spray-arc transfer methods will be covered. Tee, lap, and open groove joints will be done in all positions with solid, fluxcore, and aluminum wire. Test plates will be made for progress evaluation.
Dual Credit Availability	
Prerequisite(s): Principles of Welding Technology; and Shielded Metal Arc Welding	
Co-Requisite: Welding Technology Capstone will be taken concurrently with this course.	

Welding Technology Capstone

Agriculture Science and Business Business Technology Education Family and Consumer Science Technology Education Law, Public Safety, Corrections and Security

Career Exploration Internship

The Career Exploration Internship course is a paid or unpaid work experience in the public
or private sector that provides for workplace learning in an area of student career interest.
Unlike a cooperative education program in which students gain expertise in a specific
occupation, the career exploration internship is intended to expose students to broad
aspects of a particular industry or career cluster area by rotating through a variety of work
sites or departments. In addition to their workplace learning activities, students participate in
1) regularly scheduled meeting with their classroom teacher, or 2) a regularly scheduled
seminar with the teacher for the purpose of helping students make the connection between
academic learning and work-related experiences. Specific instructional standards tied to the
career cluster or pathway and learning objectives for the internship must be written to clarify
the expectations of all parties — the student, employer, and instructor.
A minimum of 85 hours of workplace and classroom activities are required for one credit;
170 hours are required for two credits. 255 hours are required for three credits. Of the 85 —
255 hours (at least I hour a week or the equivalent over a semester or year) must be spent
in related classroom instruction.
This course is exploratory in nature and does not qualify for reimbursement under the
career-technical (vocational) funding formula.

Work-Based Learning Capstone

Grade Level: 12	Work Based Learning Capstone is a stand-alone course that prepares students for college
Course #: 5974	and career. Work-Based Learning means sustained interactions with industry or community

WORLD LANGUAGES

World Language courses endeavor to develop students' ability to comprehend, speak, read, and write in a chosen world language, to appreciate the cultures of various countries and the various cultures within the United States, and to develop an understanding of current events and problems through an exposure to the history and geography of the German and/or Spanish-speaking worlds. An understanding of the interdependence of the modern world and the interrelatedness of languages, literatures, and cultures will be developed. Career opportunities with world language knowledge are discussed as are college world language requirements and procedures for college placement. A grade of C or better in previous English classes is recommended for students who wish to study a world language.

French I

Fulfills a World Language requirement for the Core 40 with Academic Honors Diploma	

State Approved Applied Courses for the Certificate of Completion

The new Certificate of Completion Course of Study provides a framework for providing appropriate education to students who have been taken off of a diploma path. It allows increased access to the general education curriculum, and it also guides schools in developing appropriate applied classes based on alternate achievement standards. Many students with disabilities who have had appropriate academic and vocational instruction and leave high school without a diploma are capable and willing to work; however the past Certificate of Completion was not recognized as a meaningful document by the employment community. There is now an emphasis on employability skills and the development of a transition portfolio to better showcase what students will be able to do in postsecondary employment settings after obtaining a Certificate of Completion.

If a student is placed on a non-diploma track and wishes to pursue a Certificate of Completion, new guidelines have been set, effective with students entering high school as 9th graders during the 2018 - 2019 school year. The Certificate of Completion course of study must be followed for students with an IEP who are not pursuing a diploma track. The Certificate of Completion provides increased access to the general education curriculum by providing flexibility in earning either credits or applied units in general education and/or special education classes. The Certificate of Completion can be earned through any combination of applied units and credits.

Indiana Certificate of Completion Course of Study

Effective with the students who enter high school in 2018-19 school year (Class of 2022)

The Course of Study for the Certificate of Completion is a framework for aligning curriculum to grade level standards while meeting the individual goals and transition needs stated in the student's Individual Education Plan (IEP).

Minimum total 40 credits/applied units: It is expected that these requirements are met through enrollment in a combination of general education courses for credit, modified general education courses in which non-credit applied units are earned and special education courses in which non-credit applied units are earned.

English /Languago Arts	8 credits/applied units
English/Language Arts	Including a balance of literature, composition, vocabulary, speech/communication
	4 credits/applied units
Mathematics	Including a balance of number sense, expressions, computation, data analysis, statistics, probability, equations and inequalities and personal finance. Student must take a math or applied math course each year in high school.
	4 credits/applied units
Science	Including a balance of physical, earth/nature, life, engineering and technology
Social Studies	4 credits/applied units
	Including a balance of history, civics and government, geography, economics
Physical Education	2 credits/applied units
Health & Wellness	1 credit/applied unit
	10 credits/applied units
Employability	Job exploration, work- or project-based learning experiences, employability skills (mindsets, self- management, learning strategies, social, workplace), portfolio creation, introduction to post- secondary options
	Investigation into opportunities for enrollment in postsecondary programs, work place readiness training to develop employability and independent living skills and instruction in self-advocacy
Electives	7 credits/applied units
Certificate of Completio	n Transition Portfolio

Students earning a certificate of completion fulfill at least one of the following (aligned with transition goals):

1. Career Credential: Complete an industry-recognized certification, one-year certificate or state-approved alternative

2. Career Experience: Complete project- or work-based learning experience or part time employment

- 3. Work Ethic Certificate: Earn a Work Ethic Certificate (criteria to be locally determined)
- 4. Other Work Related Activities: As determined by the case conference committee

CERTIFICATE of COMPLETION COURSES

CTE: BUSINESS, MARKETING, INFORMATION TECHNOLOGY, AND ENTREPRENEURSHIP

Applied Business Math

Grade Level: 10-12	Applied Business Math is a course designed to prepare students for roles as entrepreneurs,
Course #: 4512Apl	producers, and business leaders by developing abilities and skills that are part of any
Applied Units: 4 Maximum	business environment. A solid understanding of application of money management skills, navigating industry specific technology and apps, establishing and managing budgets, and
Counts as an Elective for the	
Certification of Completion	for students interested in careers in business related fields and everyday life. The content includes basic mathematical operations related to accounting, banking and finance, marketing, management, and retail. Instructional strategies should include simulations,
Prerequisite: None	guest speakers, tours, Internet research, and business experiences.
Fulfills a Mathematics requirement for the Certificate of Completion	
Qualifies as an applied math course for the Certificate of Completion	

Applied Digital Applications and Responsibility

Grade Level: 11-12	Applied Digital Applications and Responsibility prepares students to use technology in an
Course # 4528BApl	effective and appropriate manner in school, in a job, or everyday life. Students develop
Applied Units: 4 Maximum	skills related to word processing, spreadsheets, presentations, and communications
	software and may use highly specialized or individualized technology or software. Students
Counts as an Elective for the	learn what it means to be a good digital citizen and how to use technology, including social
Certification of Completion	media, responsibly. Students expand their knowledge of how to use digital devices and
	software to build decision-making and problem-solving skills. Students may be provided
Prerequisite: None	with the opportunity to seek industry-recognized digital literacy certifications.
Fulfills a Mathematics requirement for the Certificate of Completion	
Qualifies as an applied math course for the Certificate of Completion	

Applied Personal Financial Responsibility

Grade Level: 9-12	Applied Personal Financial Responsibility addresses the identification and management of
Course # 4540Apl	personal financial resources to meet the financial needs and wants of individuals and
Applied Units: 2 Maximum	families, considering a broad range of economic, social, cultural, technological,
	environmental, and maintenance factors. This course helps students build and apply skills
Counts as an Elective for the	in financial literacy and responsible decision making. Content includes analyzing personal
Certification of Completion	standards, needs, wants, and goals; identify sources of income, and navigating technology
	for money management. A project based approach and applications through authentic
	settings such as work based observations, service learning experiences and community
	based instruction are appropriate. Direct, concrete applications of basic mathematics
Prerequisite: None	proficiencies in projects are encouraged.

Applied Preparing for College and Careers

Grade Level: 9-12	Applied Preparing for College and Careers addresses the knowledge, skills, and behaviors
Course # 5394Apl	all students need to be prepared for success in college, career, and life. The focus of the
Applied Units: 2 Maximum	course is the impact of today's choices on tomorrow's possibilities. Topics to be addressed
	include twenty-first century life and career skills; higher order thinking, communication,
Counts as an Elective or	leadership, and management processes; exploration of personal aptitudes, interests,
Employability for the Certification	values, and goals; examining multiple life roles and responsibilities as individuals and family
of Completion	members; planning and building employability skills; transferring school skills to life and
	work; and managing personal resources. This course includes reviewing the 16 national
	career clusters and Indiana's College and Career Pathways, in- depth investigation of one
	or more pathways, reviewing graduation plans, developing career plans, and developing
	personal and career portfolios. A project-based approach, including computer and
	technology applications, cooperative ventures between school and community, simulations,
Prerequisite: None	and real life experiences, is recommended.

Applied Cooperative Education

Grade Level: 11-12 Course # 6162Apl Applied Units: 6 Maximum	Applied Cooperative Education is an approach to employment training that spans all career and technical education program areas through school-based instruction and on the job training. Time allocations are a minimum of fifteen hours per week of on-the-job training and approximately five hours per week of on-the-job training and
Counts as an Elective or Employability for the Certification of Completion	approximately five hours per week of school-based instruction, focused on employability skills development. Additionally, all state and federal laws and regulations related to student employment and cooperative education must be followed.
Prerequisite: None	

Applied Adult Roles and Responsibilities

Grade Level: 9-12	Applied Adult Roles and Responsibilities is recommended for all students as life foundations
Course # 5330Apl	and academic enrichment for students with interest in family and community services,
Applied Units: 2 Maximum	personal and family finance, and similar areas. This course builds knowledge, skills,
	attitudes, and behaviors that students will need as they complete high school and prepare to
Counts as an Elective or	take the next steps toward adulthood in today's society. The course includes the study of
Employability for the Certification	interpersonal standards, lifespan roles and responsibilities, individual and family resource
of Completion	management, and financial responsibility and resources. A project or community based
	approach that utilizes problem solving skills, communication, leadership, self-determination
	skills, management processes, and fundamentals to college, career and community
	membership success. Service learning and other authentic applications are strongly
Prerequisite: None	recommended.

Applied Consumer Economics

Grade Level: 9-12	Applied Consumer Economics enables students to apply economic principles to their
Course # 5334Apl	individual, family, workplace, and community lives. A project-based approach that utilizes
Applied Units: 1 Maximum	higher order thinking, communication, leadership, self-determination and management
	processes is recommended to strengthen the understanding and application of consumer
Counts as an Employability or	economics issues. The course focuses on interrelationships among economic principles
Social Studies requirement for	and individual and family roles of exchanger, consumer, producer, saver, investor, and
the Certification of Completion	citizen. Economic principles to be studied include scarcity, supply and demand, market
	structure, the role of government, money and the role of financial institutions, labor
Prerequisite: None	productivity, economic stabilization, and trade.

Applied Human Development and Wellness

Grade Level: 9-12	Applied Human Development and Wellness is valuable for all students as a life foundation
Course # 5366Apl	and academic enrichment. Course content includes individuals' physical, social, emotional,
Applied Units: 2 Maximum	and moral development and wellness across the lifespan. Major topics include principles of human development and wellness; impacts of family on human development and wellness;
Counts as an Employability	factors that affect human development and wellness; practices that promote human
Requirement or Elective for the	development and wellness; managing resources and services related to human
Certification of Completion	development and wellness; and career exploration in human development and wellness.
	Life events and contemporary issues addressed in this course include (but are not limited
	to) change; stress; abuse; personal safety; and relationships among lifestyle choices, health
	and wellness conditions, and diseases. A project or community based approach that utilizes
	problem solving skills, communication, leadership, self-determination skills, and
	management processes is recommended in order to apply and generalize these skills in
Prerequisite: None	authentic settings

Applied Interpersonal Relationships

Grade Level: 9-12	Applied Interpersonal Relationships is an introductory course that is relevant for students
Course # 5364Apl	interested in careers that involve interacting with people and for everyday life relationships.
Applied Units: 2 Maximum	This course addresses knowledge and skills needed for positive and productive
	relationships in career, community, and family settings. Major course topics include
Counts as an Employability	communication skills; leadership, self-determination, teamwork, and collaboration; conflict
Requirement or Elective for the	prevention, resolution, and management; building and maintaining relationships; and
Certification of Completion	individual needs and characteristics and their impacts on relationships. A project or
	community based approach is recommended in order to apply these topics of interpersonal
	relationships. This course provides a foundation for all careers and everyday life
	relationships that involve interacting with people both inside and outside of a
	business/organization, including team members, clients, patients, customers, the general
Prerequisite: None	public, family and friends.

Applied Nutrition and Wellness

Grade Level: 9-12	Applied Nutrition and Wellness is an introductory course valuable for all students as a life
Course # 5342Apl	foundation and academic enrichment. This is a nutrition class that introduces students to
Applied Units: 2 Maximum	only the basics of food preparation so they can become self- sufficient in accessing healthy
	and nutritious foods. Major course topics include nutrition principles and applications;
Counts as an Employability	influences on nutrition and wellness; food preparation, safety, and sanitation; and science,
Requirement or Elective for the	technology, and careers in nutrition and wellness. A project-based approach that utilizes
Certification of Completion	higher order thinking, communication, leadership, self-determination, and management
	processes, and fundamentals to college and career success is recommended in order to
	integrate these topics into the study of nutrition, food, and wellness. Food preparation
	experiences are a required component. Direct, concrete mathematics and language arts
Prerequisite: None	proficiencies will be applied.

Applied Personal Financial Responsibility

Grade Level: 9-12	Applied Personal Financial Responsibility addresses the identification and management of
Course # 4540Apl	personal financial resources to meet the financial needs and wants of individuals and
Applied Units: 2 Maximum	families, considering a broad range of economic, social, cultural, technological,
	environmental, and maintenance factors. This course helps students build and apply skills
Counts as an Elective for the	in financial literacy and responsible decision making. Content includes analyzing personal
Certification of Completion	standards, needs, wants, and goals; identify sources of income, and navigating technology
	for money management. A project based approach and applications through authentic
	settings such as work based observations, service learning experiences and community
	based instruction are appropriate. Direct, concrete applications of basic mathematics
Prerequisite: None	proficiencies in projects are encouraged.
Qualifies as applied math course for the Certificate of Completion	

Applied Preparing for College and Careers

Grade Level: 9-12	Applied Preparing for College and Careers addresses the knowledge, skills, and behaviors
Course # 5394Apl	all students need to be prepared for success in college, career, and life. The focus of the
Applied Units: 2 Maximum	course is the impact of today's choices on tomorrow's possibilities. Topics to be addressed include twenty-first century life and career skills; higher order thinking, communication,
Counts as an Elective or	leadership, and management processes; exploration of personal aptitudes, interests,
Employability requirement for the	values, and goals; examining multiple life roles and responsibilities as individuals and family
Certification of Completion	members; planning and building employability skills; transferring school skills to life and
	work; and managing personal resources. This course includes reviewing the 16 national
	career clusters and Indiana's College and Career Pathways, in- depth investigation of one
	or more pathways, reviewing graduation plans, developing career plans, and developing
	personal and career portfolios. A project-based approach, including computer and
	technology applications, cooperative ventures between school and community, simulations,
Prerequisite: None	and real life experiences, is recommended.

Applied Work-Based Learning Capstone

Grade Level: 11, 12	Applied Work Based Learning Capstone is an instructional strategy that can be implemented
Course #: 5974Apl	as a stand-alone course or a component of any CTE course that prepares students for
Length: Full Year	college and career. This strategy builds individual students' skills and knowledge within the

Counts as an Employability	evaluating progress and performance, whether WBL is a stand-alone course or a component
Requirement, Capstone Course	of a discipline-specific CTE
or Elective for the Certification	
of Completion	

Applied Interdisciplinary Cooperative Education (ICE)

Grade Level: 11-12 Course # 5902Apl Applied Units: 6 Maximum Counts as an Employability Requirement or Elective for the Certification of Completion	Applied Interdisciplinary Cooperative Education (ICE) spans all career and technical education program areas through an interdisciplinary approach to training for employment. Time allocations vary by student needs, interests and goals but include a combination of work-based learning and school-based instruction. Additionally, all state and federal laws and regulations related to student employment and cooperative education must be followed. The following two components must be included as part of the Interdisciplinary Cooperative Education course.
	Related Instruction , that is classroom- or site- based, shall be organized and planned around the activities associated with the student's individual job and career objectives; and shall be taught during the same semesters as the student is receiving on-the-job training. Student performance should be monitored to determine progress in (a) general occupational competencies, (b) specific occupational competencies, and (c) specific job competencies.
Droroquiaito: Nono	On-the-Job Training is the actual work experience in an occupation in any one of the Indiana College and Career Pathways that relates directly to the student's career objectives. On-the-job, the student shall have the opportunity to apply the concepts, skills, and attitudes learned during related instruction, as well as the skills and knowledge that have been learned in other courses. The student shall be placed on-the-job under the direct supervision of experienced employees who serve as on-the-job trainers/supervisors in accordance with pre- determined training plans and agreements and who assist in evaluating the student's job performance. Students in an ICE placement must be paid in exercise with force and extendent employment and eccentrative education laws.
Prerequisite: None	

Applied Career Exploration Internship

Grade Level: 11-12	The Applied Career Exploration Internship course is a paid or unpaid work experience in the
Course #: 0530Apl	public or private sector that provides for workplace learning in an area of student career
Applied Units:	interest. Unlike a cooperative education program in which students gain expertise in a specific occupation, the career exploration internship is intended to expose students to broad
Counts as an Employability	aspects of a particular industry or career cluster area by rotating through a variety of work
Requirement, Capstone Course or Elective for the Certification	sites or departments. In addition to their workplace learning activities, students participate in 1) regularly scheduled meetings with their classroom teacher, or 2) a regularly scheduled
of Completion	seminar with the teacher for the purpose of helping students make the connection between academic learning and their work-related experiences. Specific instructional standards tied to the career cluster or pathway and learning objectives for the internship must be written to clarify the expectations of all parties – the student, parent, employer, and instructor.
Prerequisite: None	NOTE: This course is exploratory in nature and, as such, does not qualify for reimbursement under the career and technical education funding formula.

Counts as an Ele & Wellness requ Certification of C	irement for the	behaviors that protect and promote health and avoid or reduce health risks. Through a variety of instructional strategies, students practice the development of functional health information (essential concepts); determine personal values that support health behaviors; develop group norms that value a healthy lifestyle; develop the essential skills necessary to adopt, practice, and maintain health-enhancing behaviors. This course includes the application of priority areas in a planned, sequential, comprehensive health education curriculum. Priority areas include: promoting personal health and wellness, physical activity, and healthy eating; promoting safety and preventing unintentional injury and violence; promoting mental and emotional health, a tobacco-free lifestyle and an alcohol- and other drug-free lifestyle; and promoting human development and family health. This course provides students with the knowledge and skills of health and wellness core concepts,
		analyzing influences, accessing information, interpersonal communication, decision-making
		and goal-setting skills, health-enhancing behaviors, and health and wellness advocacy
Prerequisite: No	one	skills.

Applied Algebra I

Grade Level: 9-12 Course # 2520Apl Applied Units: 4 Maximum	Applied Algebra I formalizes and extends the mathematics students learned in the middle grades. Algebra I is made up of 4 strands: Numbers Sense, Expressions and Computation; Linear Equations, Inequalities, and Functions; Systems of Equations and Inequalities; and Quadratia and Exponential Equations and Exponential Equations.
Counts as a Math Requirement for the Certification of Completion	Quadratic and Exponential Equations and Functions. The strands are further developed by focusing on the content of the Algebra content connectors.
Prerequisite: None	

Applied Algebra I Lab

Grade Level: Course #	9-12 2516Apl	Applied Algebra I Lab is a mathematics support course. Algebra I Lab should be taken while students are concurrently enrolled in a math course or have met the math requirements for
Applied Units:	4 Maximum	the certificate of completion. This course provides students with additional time to build the foundations necessary for high school math courses and work on specific, individualized
	thematics Course or the Certification	math skills, while concurrently having access to rigorous, grade-level appropriate courses. The five critical areas align with the critical areas of math: number sense, computation, data analysis, geometry, measurement and algebraic thinking. Algebra I Lab combines standards from high school courses with foundational standards from the middle grades.
Prerequisite: M Algebra I	ust be enrolled in	
Applied Algeb	ora I Lab is designe must also be e	d as a support course for Applied Algebra I. As such, a student taking Applied Algebra I Lab enrolled in Algebra I or Applied Algebra I during the same academic year.

Applied Geometry

Grade Level:	9-12	Applied Geometry formalizes and extends students' geometric experiences from the middle
Course #	2532Apl	grades. These critical areas comprise the Geometry course: points, lines, angles, and
Applied Units:	4 Maximum	planes; triangles; quadrilaterals and other polygons; circles; transformations; and three- dimensional solids. The eight process standards for mathematics apply throughout the
Counts as a Math Requirement for the Certification of Completion		course. Together with the content standards, the process standards prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.
Prerequisite: None		

Applied Mathematics Lab

Grade Level: Course # Applied Units:	9-12 2560Apl 4 Maximum	Applied Mathematics Lab provides students with individualized instruction designed to increase math related competencies and/or mathematics coursework aligned with Indiana's Academic Standards or Content Connectors for Mathematics.
Counts as an Elective for the Certification of Completion		
Prerequisite: No Recommendatio		

Applied Basic Skills Development

Grade Level: 11-12	Applied Basic Skills Development is a multidisciplinary course that provides students
Course # 0500Apl	continuing opportunities to develop basic skills including: (1) reading, (2) writing, (3)
Applied Units: 8 Maximum	listening, (4) speaking, (5) mathematical computation, (6) note taking, (7) study and
	organizational skills, and (8) problem-solving skills, (9) employability skills, which are
Counts as an Employability	essential for high school achievement and post-secondary outcomes. Determination of the
Requirement, Capstone Course	skills to be emphasized in this course is based on Indiana's Standards and Content
or Elective for the Certification of	Connectors, individual school corporation general curriculum plans, and the student's
Completion	Individualized Education Programs (IEP) or other individualized plans. Skills selected for
	developmental work provide students with the ability to continue to learn in a range of
	different life situations and may be applied using instructional practices related to
Prerequisite: None	community based instruction.

Applied Community Service

Grade Level: 11-12 Course # 0524Apl Applied Units: 2 Maximum	Applied Community Service is a course created by public law IC 20-30-14. Community service allows students in grades nine through twelve (HEA 1629) opportunity to earn up to two high school credits for completion of approved community service projects or volunteer service that "relates to a course in which the student is enrolled or intends to enroll."
Counts as an Employability Requirement, Capstone Course or Elective for the Certification of Completion	
Prerequisite: None	

Applied Elective Physical Education

Grade Level: 9-12	Applied Elective Physical Education, a course based on selected standards from Indiana's
Course # 3560Apl	Academic Standards for Physical Education, identifies what a student should know and be
Applied Units: 8 Maximum	able to do as a result of a quality physical education program. The goal of a physically
	educated student is to maintain appropriate levels of cardio- respiratory endurance,
Counts as a Health & Wellness	muscular strength and endurance, flexibility, and body composition necessary for a healthy
Requirement for the Certification	and productive life. Elective Physical Education promotes lifetime sport and recreational
of Completion	activities and provides an opportunity for an in-depth study in one or more specific areas.
	This course includes the study of physical development concepts and principles of sport
	and exercise as well as opportunities to develop or refine skills and attitudes that promote
	lifelong fitness. With staff support, students have the opportunity to design and develop an
	appropriate personal fitness program that enables them to achieve a desired level of fitness
Prerequisite: Physical Education	and includes self- monitoring. Ongoing assessment may include individual progress and/or
&	performance-based skill evaluation.

Applied Physical Education I

Grade Level: 9-12 Course # 3542Apl Applied Units: 2 Maximum	Applied Physical Education I focuses on instructional strategies through a planned, sequential, and comprehensive physical education curriculum that provides students with opportunities to actively participate in at least four of the following: team sports; dual sport activities; individual physical activities; outdoor pursuits; self-defense and martial arts;
Counts as a Health & Wellness Requirement for the Certification of Completion	aquatics; gymnastics; and dance, all which are within the framework of lifetime physical activities and fitness. Ongoing assessment includes individual progress and performance-based skill evaluation.
Prerequisite: None	

Applied Physical Education li

Grade Level: 9-12 Course # 3544Apl Applied Units: 2 Maximum	Applied Physical Education II focuses on instructional strategies through a planned, sequential, and comprehensive physical education curriculum that provides students with opportunities to actively participate in four of the following areas that were not covered in Physical Education I: team sports; dual sport activities; individual physical activities; outdoor
Counts as a Health & Wellness Requirement for the Certification of Completion	pursuits; self-defense and martial arts; aquatics; gymnastics; and dance, all which are within
Prerequisite: Physical Education I	

Applied Biology I

Grade level: 9-12	Biology I is a course based on the following core topics: cellular chemistry, structure and
Course #: 3024	reproduction; matter cycles and energy transfer; interdependence of organisms; molecular
Credit(s): 4 Maximum	basis of heredity; genetics and evolution. Instruction should focus on developing student understanding that scientific knowledge is gained from observation of natural phenomena
Counts as a Science	and experimentation by designing and conducting investigations guided by theory and by
Requirement for the Certification	evaluating and communicating the results of those investigations according to accepted
of Completion	procedures.
Prerequisite: None	

Applied Earth and Space Science I

Grade Level: 9-12	Applied Earth and Space Science I is a course focused on the following core topics: study
Course # 3044Apl	of the earth's layers; atmosphere and hydrosphere; structure and scale of the universe; the
Applied Units: 4 Maximum	solar system and earth processes. Students analyze and describe earth's interconnected
	systems and examine how Earth's materials, landforms, and continents are modified across
Counts as an Elective or Science	geological time. Instruction should focus on developing student understanding that scientific
Requirement for the Certification	knowledge is gained from observation and experimentation by conducting investigations
of Completion	and evaluating and communicating the results of those investigations. Course may include
	a variety of learning experiences and tools support the process of investigation, data
	collection and analysis.
Prerequisite: None	

Applied Life Science

Grade Level: 9-12 Course # 3030Apl Applied Units: 2 Maximum	Applied Life Science is an introduction to biology course. Students develop problem-solving skills and strategies while performing laboratory and field investigations of fundamental biological concepts and principles. Students explore the functions and processes of cells within all living organisms, general concepts of genetics, and the relationships of living
Counts as an Elective or Science Requirement for the Certification of Completion	organisms to each other and to the environment as a whole.
Prerequisite: None	

Applied Physical Science

Grade Level: 9-12 Course # 3102Apl Applied Units: 2 Maximum	Applied Physical Science is a course in which students develop problem solving skills and strategies while performing laboratory and field investigations of fundamental chemical, physical, and related Earth and space science concepts and principles that are related to students' interests and that address everyday problems.
Counts as an Elective or Science Requirement for the Certification of Completion Prerequisite: None	

Applied Current Problems, Issues and Events

Grade Level: 9-12	Applied Current Problems, Issues, and Events gives students the opportunity to apply
Course # 1512Apl	investigative and inquiry techniques to the study of problems or issues existing in the class,
Applied Units: 2 Maximum	school, community, state, country or world. Students develop competence in (1) recognizing
	cause and effect relationships, (2) recognizing fallacies in reasoning and propaganda
Counts as an Elective,	devices, (3) synthesizing knowledge into useful patterns, (4) stating and testing hypotheses,
Employability or Social Studies	and (5) generalizing based on evidence. Problems or issues selected will have significance
Requirement for the Certification	to the student and will be studied from the viewpoint of the social science disciplines.
of Completion	Community service programs and internships within the community may be included.
Prerequisite: None	

Applied Economics (ECON)

Grade Level: 9-12	Applied Economics examines the allocation of resources and their uses for satisfying
Course # 1514Apl	human needs and wants. The course identifies economic behaviors of consumers,
Applied Units: 2 Maximum	producers, savers, investors, workers, voters, institutions, governments, and societies in making decisions. Students explain that because resources are limited, people must make
Counts as a Social Studies	choices and understand the role that supply, demand, prices, and profits play in a market
Requirement or Elective for the	economy. Key elements of the course include the study of scarcity and economic
Certification of Completion	reasoning; supply and demand; market structures; the role of government; national
	economic performance; the role of financial institutions; economic stabilization; and trade.
	Students may be offered opportunities to better understand and apply course content
	through a variety of instructional strategies including project- and community-based
Prerequisite: None	instruction and real world experiences.

Applied Geography and History of The World

Grade Level: 9-12	Applied Geography and History of the World is designed to enable students to use
Course # 1570Apl	geographical tools, skills and historical concepts to apply their understanding of major
Applied Units: 4 Maximum	global themes including the origin and spread of world religions; exploration; conquest, and
	imperialism; urbanization; and innovations and revolutions. Geographical and historical
Counts as a Social Studies	skills include forming research questions, acquiring information by investigating a variety
Requirement or Elective for the	sources, organizing information by creating graphic representations, analyzing information
Certification of Completion	to understand, determine and explain patterns and trends, planning for the future, and
	documenting and presenting findings orally or in writing. Students use the knowledge,
	tools, and skills obtained from this course in order to understand, analyze, evaluate, and
	make predictions about major global developments. This course is designed to nurture
	perceptive and responsible citizenship, to encourage and support the development of
	critical thinking skills and lifelong learning, and to help prepare Indiana students for the 21st
Prerequisite: None	Century.

Applied Indiana Studies

Grade Level: 9-12 Course # 1518Apl Applied Units: 2 Maximum Counts as a Social Studies Requirement or Elective for the Certification of Completion	Applied Indiana Studies is an integrated course that compares and contrasts state and national developments in the areas of politics, economics, history, and culture. The course uses Indiana history as a basis for understanding current policies, practices, and state legislative procedures. Examination of individual leaders (state or local) and their roles in a democratic society will be included. Student will examine the participation of citizens in the political process to understand their role. Selections from Indiana arts and literature may also be analyzed for insights into historical events and cultural expressions.	
Prerequisite: None		
Must be offered at least once per school year		

Applied State and Local Government

Course # 1536Apl d	Applied State and Local Government is the study of the function and organization of state, county, city, town, and township government units. This course also traces the role and
· · · i	influence of political and social institutions on a state's political development. The implications of this development for governmental units should be discussed relative to
Requirement or Elective for the	current political and governmental situations. Field trips, observations, and interviews with state and local leaders should be encouraged whenever possible and content may also
Certification of Completion 1 Prerequisite: None	focus on school or social communities.

Applied Topics in History

Grade Level: 9-12	Applied Topics In History provides students the opportunity to study specific historical eras,
Course # 1538Apl	events, or concepts. Application of knowledge and development of historical research skills
Applied Units: 2 Maximum	using primary and secondary sources is included. The course focuses on one or more
	topics or themes related to United States or world history. Examples of topics might include:
Counts as a Social Studies	(1) twentieth- century conflict, (2) the American West, (3) the history of the United States
Requirement or Elective for the	Constitution, and (4) democracy in history.
Certification of Completion	
Prerequisite: None
