

Friday, February 28, 2020

Two sessions running concurrently, 10 a.m. - 2 p.m.

Cyber Connection is an opportunity to engage high school students with computer building, installing network adapters and designing a wireless network to help show students its vulnerabilities. Students will also learn computer attack techniques used by systems administrators to test basic security of computers and networks.

The goal of Cyber Connection is to give Ivy Tech Community College the opportunity to enlighten students about Information Technology careers as well as showcase our Cyber Security program. The Cyber Security program has been designated as a *National Center of Academic Excellence in Cyber Defense Two-Year Education* by the U.S. Department of Homeland Security and the National Security Agency (NSA).

Ivy Tech Community College

8000 South Education Drive
