

STEM NEWS

The 3rd quarter STEM focus includes the human body. We will be talking about the five senses, body parts, nutrition, sleep, dental care, and other needs that a human body has to survive.

We need to take care of our bodies so we can grow and learn. Do you know which foods are good choices and which foods are not for good nutrition? Do you know how much sleep you should get every night? Do you know how to dress when it is cold outside? Do you know how to take care of your teeth? These are just some of the questions we will be addressing this quarter.
