

## **e-Learning Activities for 4/7/20**

Parents, I tried my best to put these activities together so that you can do these activities at home with your child with things you have around the house. You can click on the underlined texts below. They will link you to a website that I have checked and should work on phones, tablets or computers. Some links are to games and others are to websites with ideas.

### **Literacy/Language Arts**

#### **Scholastic Reading/Book Study**

This link will take you to a great resource from Scholastic. Scroll down to Day 1: Animal Studies – Rabbits. There you will be able to read a short book to them and they can watch another. Scholastic has some great resources to work on vocabulary (Word Match) and sequencing (Which Came First?). The fact or fiction link is probably too hard for preschool.

#### **Phonics Basket**

This is a great activity that helps kids learn letter sounds at the beginning of words. It also allows students to sort things by their beginning sounds. Use toys you have around the house. If you do not have baskets, use bowls or other containers to help them sort the items. Click the link and enjoy letting them learn with their own toys!

#### **Alphabet Song**

Click the link and have your student sing along to the alphabet song.

### **Math**

#### **Calendar**

Click on this link. When it takes you to the website, click on the picture of the calendar which is next to the word seasonal on the top right.

#### **Comparing Weights Game**

This is a fun game to help students compare weights of objects. Either add weight or take weight off the scale to balance it.

#### **Comparing Sizes**

After playing the online game above, have your child compare the size of their foot or shoe to the size of someone else in the family. They can also look at the size of their hands, legs, or even overall height. Then let them try to put everyone's sizes in order from shortest to longest or shortest to tallest.

### **Get Moving**

#### **Just Dance Kids - I'm Gonna Catch You**

This cute little video allows kids to get moving. They can follow along with the dance moves on the screen and it can help them get a little energy out in the process.
